THE FOLLOWING IS A NOTICE OF AVAILABILITY FOR THE DRAFT ENVIRONMENTAL IMPACT REPORT (EIR) FOR THE RUNWAY 6L-24R AND RUNWAY 6R-24L RUNWAY SAFETY AREA (RSA) AND ASSOCIATED IMPROVEMENTS PROJECT AT LOS ANGELES INTERNATIONAL AIRPORT (LAX) AND NOTIFICATION OF A RELATED PUBLIC WORKSHOP.

PROJECT LOCATION AND DESCRIPTION: LAWA has prepared a project-level Draft EIR for the Runway 6L-24R and Runway 6R-24L RSA and Associated Improvements Project (proposed Project), pursuant to the California Environmental Quality Act (CEQA). The proposed Project is located in the North Airfield of Los Angeles International Airport. The proposed Project would include: (1) Runway 6L-24R and Runway 6R-24L RSA Improvements including implementation of declared distances, relocation of airport service roads, covering a portion of the Argo Ditch, closure of LAWA equipment parking areas, relocation of security gates, relocation of a portion of the Air Operations Area (AOA) fence, and realignment of taxiway holdbars; (2) Pavement Reconstruction of the eastern portion of Runway 6L-24R; and; (3) Pavement reconstruction of Taxiway AA and realignment of taxiway holdbars, markings, and lighting on Taxiways Y, Z, and AA. The proposed Project would not result in increased or decreased aviation activity at LAX compared to existing conditions.

SIGNIFICANT IMPACTS ASSOCIATED WITH THE PROJECT: Implementation of the proposed Project is expected to result in significant and unavoidable impacts related to air quality and human health risk during construction activities. There is also the potential for a significant cumulative noise impact during construction. These impacts, however, are short-term and temporary and would not occur during operations of the proposed Project.
