

Construction Hot Topics

Week of November 11, 2019

1. Terminal B: Arrivals Level Lane Restrictions

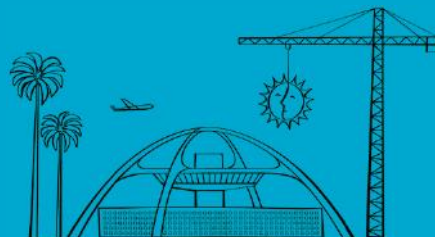

- Arrivals Level inner lanes and the right-most pickup lane at Terminal B will be closed nightly (1AM to 6AM) through Friday, November 22, 2019
- The lane restrictions are required to facilitate the 6-foot extensions of the outer commercial islands in front of Terminal B and provide more space to hold passengers
- During construction, the outer commercial islands will be closed continuously and all impacted shuttle stops on the inner lanes (LAWA Shuttles: LAX-it, LAX Airline Connection, FlyAway) will be shifted to accommodate passenger pick-ups and drop-offs
- Wayfinding will be in place

Terminal B: Arrivals Level Roadway

Change is in the Air(port).

LAX WAY BETTER. REALLY.

Construction Hot Topics

Week of November 11, 2019

2. Automated People Mover: Foundation Milestone

- The APM Project reached a milestone last week with the completion of the first Cast-In-Drilled-Hole (CIDH) pile, which will form the foundation for the future guideway and stations
- Scheduled to open in 2023, the 2.25-mile automated train will be supported by more than 250 piles
- CIDH piles are currently being worked on between Parking Structures 1 and 7 along Center Way (future East CTA station) and at the future Intermodal Transportation Facility (ITF) West station off 96th Street
