Construction Hot Topics  
*Week of December 28, 2020*

1. Terminal 2 & 3: Construction Update
   - Construction continues on both Terminals 2 & 3, including the structure pictured below that will become the future Terminal 2 / 3 Head House building upon completion
   - The Head House will connect Terminals 2 & 3 and provide access to the APM's future Center CTA Station
   - Lane restrictions are now in place on the Departures Level roadway while a temporary pedestrian walkway is built to maintain passenger traffic during construction; this walkway is scheduled to be in place through November 15, 2021

2. Intermodal Transportation Facility – West: Construction Update
   - Construction continues on the Intermodal Transportation Facility – West (ITF-West), which is scheduled to open in 2021
   - Upon completion, ITF-West will feature roughly 4,300 parking stalls for short and long-term parking, provide additional drop-off and pick-up locations, and connect to the Automated People Mover
   - ITF-West is located between Westchester Parkway and 96th Street

3. Terminal 4.5 Core: Construction Update

- Construction is progressing on the Terminal 4.5 Core building between Terminals 4 & 5
- Structural steel is being erected with the help of an airside tower crane, both of which are visible from inside the Central Terminal Area
- Lane restrictions are in place on both the Departures and Arrivals Level roadways to facilitate temporary pedestrian walkways during construction; the Departures Level temporary pedestrian walkway can be seen in the photo below
- Upon completion, the Terminal 4.5 Core building will connect with the future APM West CTA Station

4. LAX Holiday Construction Moratorium

- The LAX Christmas / New Year Holiday Construction Moratorium will end today, Monday, January 4, at 9PM
- This moratorium was put in place to limit construction-related shutdowns, allowing for critical public-use areas, traffic lanes and utilities to remain available to guests during these peak holiday travel periods
