Calendar Year LAX January 2019

Calendar Year LAX January 2019

Calendar Year LAX January 2019

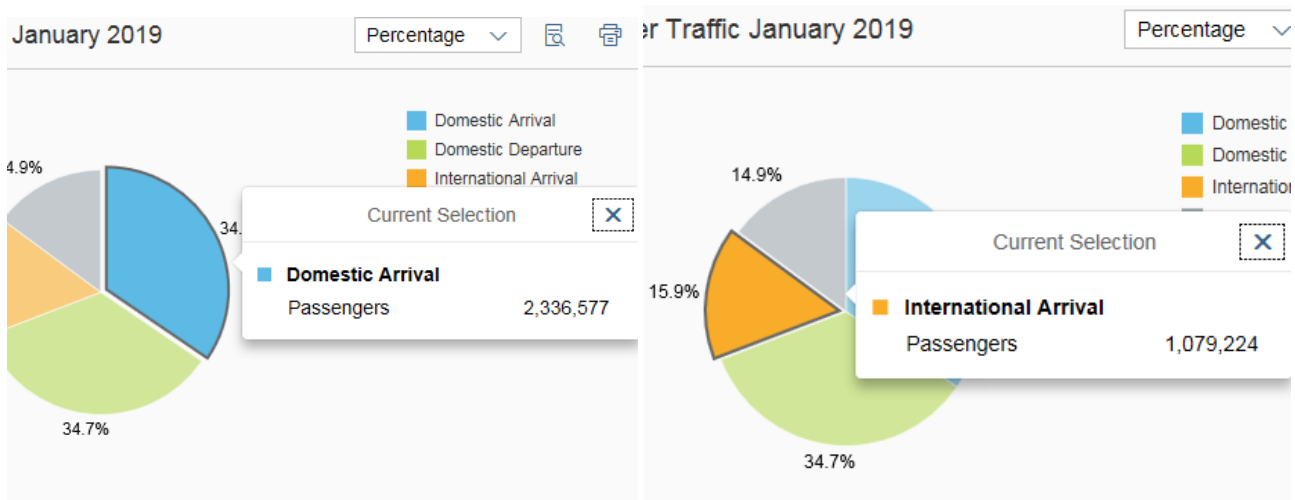

Passenger Traffic

Pie chart displays all passenger traffic for the selected criteria.

Each piece of the pie is clickable for additional information regarding that slice.

- 34.5% represents 2,336,577 Domestic Arrival Passengers.
- 15.93% represents 1,079,224 International Arrival Passengers.

Something cool! - the row of icons at the top of the graph

allow for additional functionality.

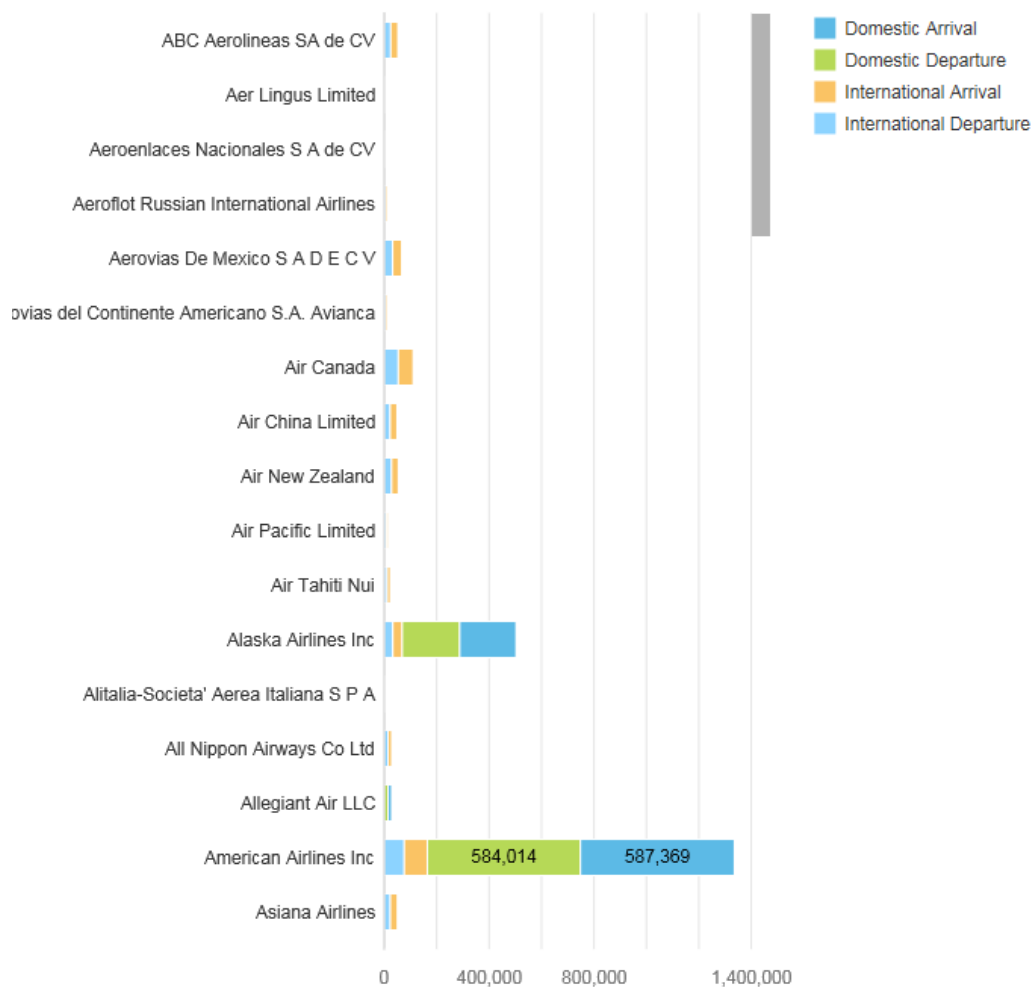

Print pie chart/bar graph to PDF

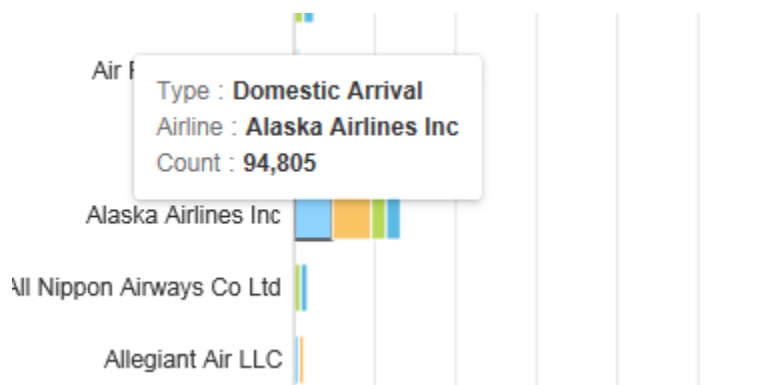

Airline Details – When clicked the airline details pop up is presented and shows the breakdown per airline.

Airline Details

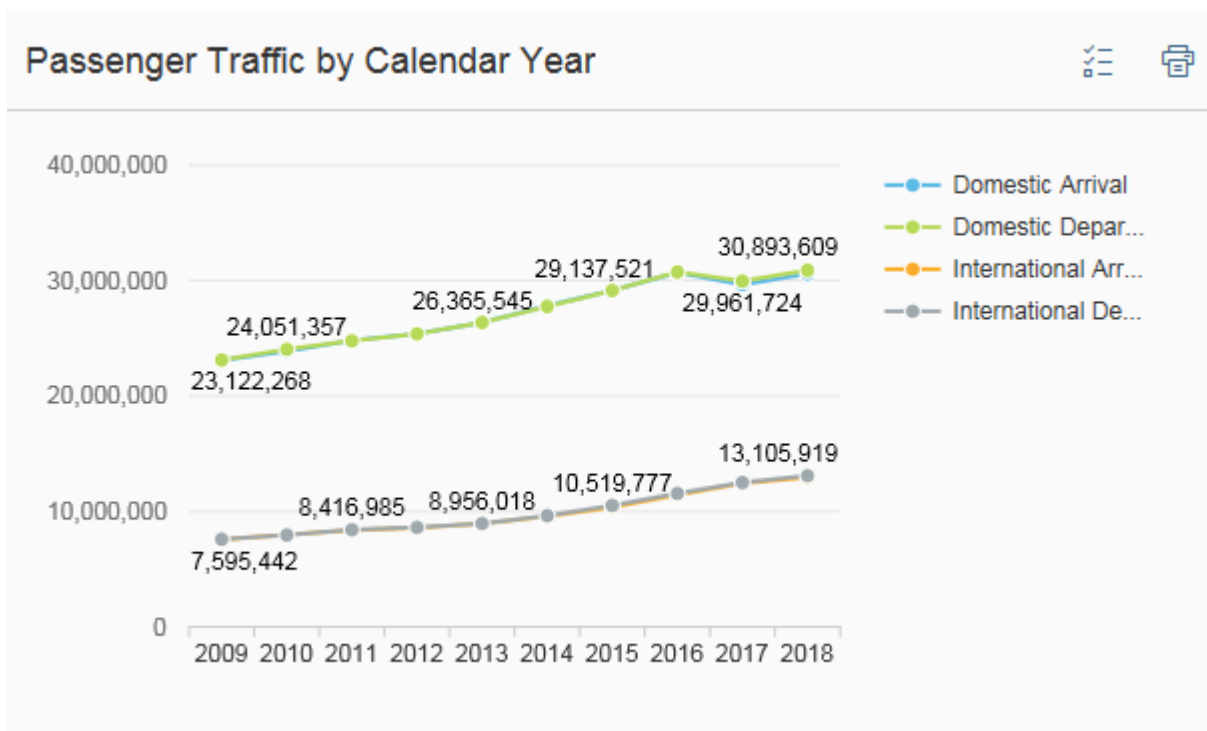

To see more information regarding the stacked bar graph simply hover over and the information is displayed.

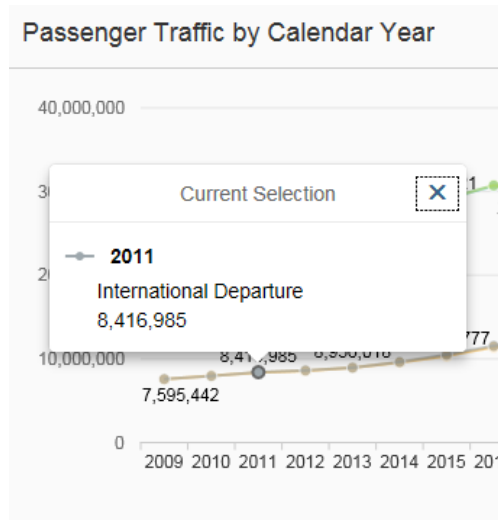

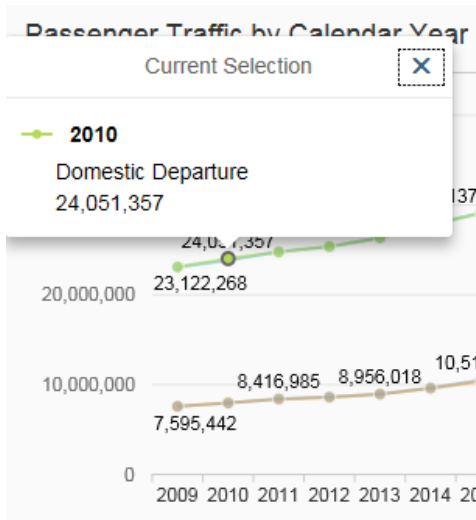

Passenger Traffic by Calendar Year

Line graph shows passenger traffic for the 10 most recently completed calendar years. This is a static report that shows for all reporting airports.

Each plot point is clickable for additional information regarding that plot point.

Something cool! - the row of icons at the top of the graph

allow for additional functionality.

This icon allows you to show/hide lines on the graph. FYI – since arrivals and departures for Domestic and International closely mimic each other there may be some overlap of the lines.

Selection

☒ Domestic Arrival

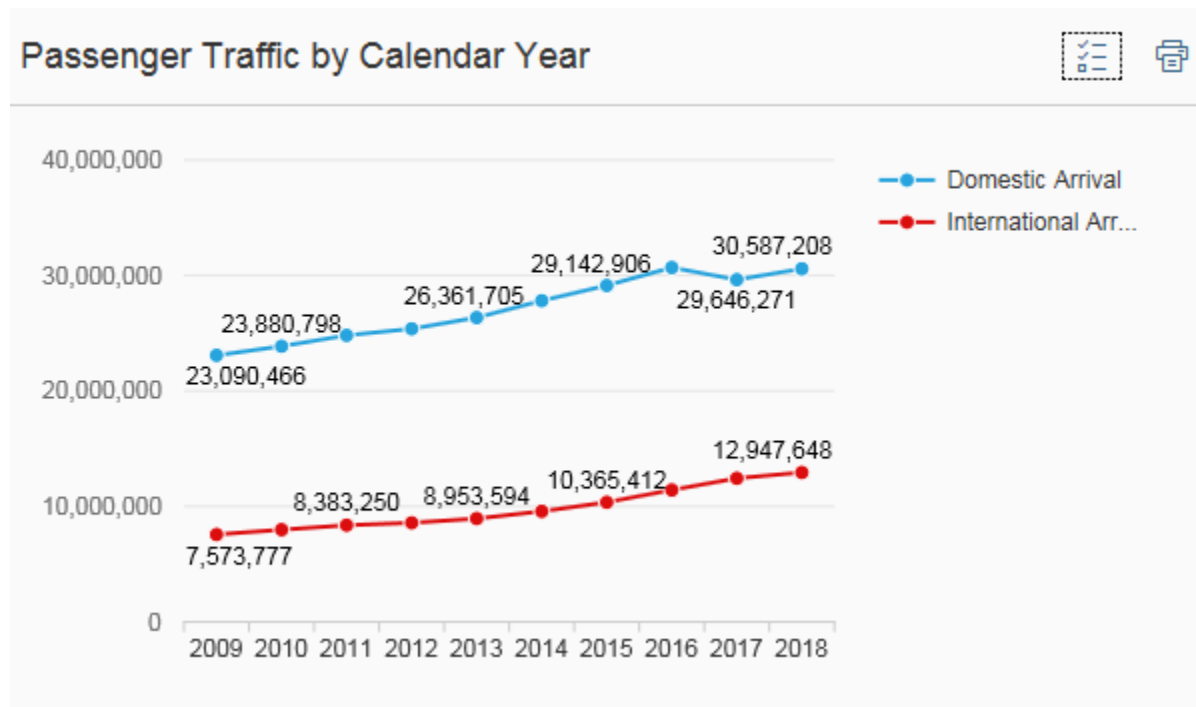

☐ Domestic Departure

☒ International Arrival

☐ International Departure

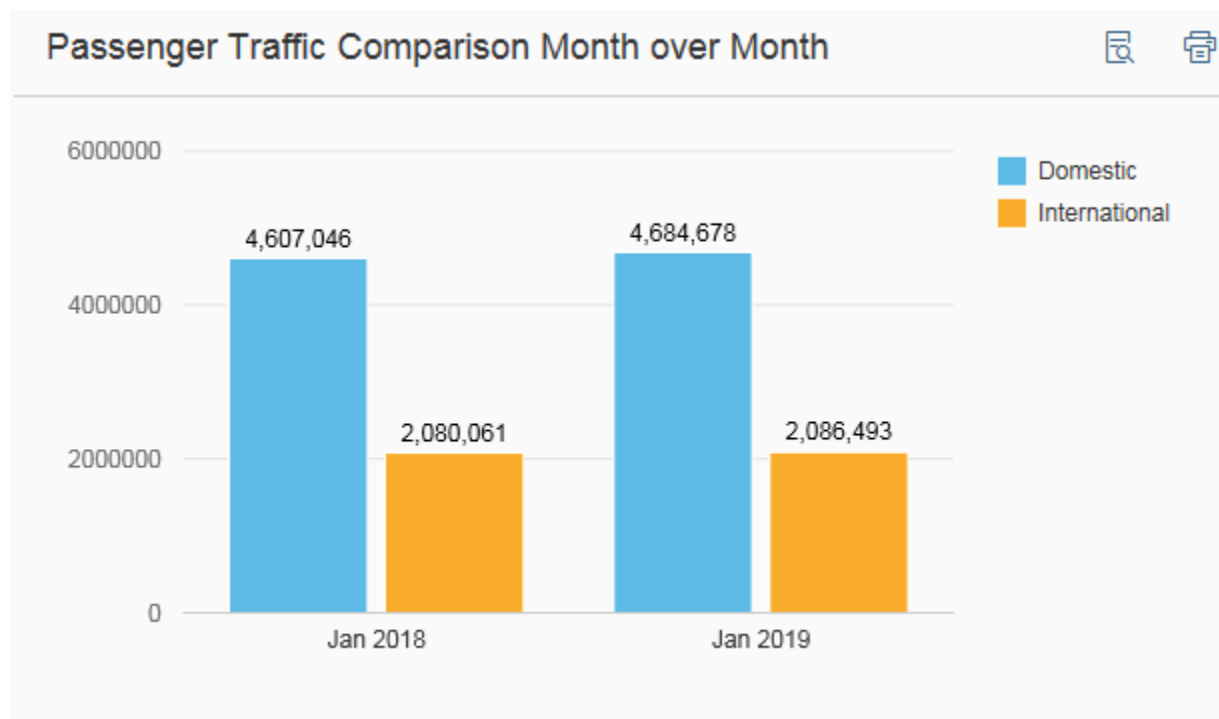

Ok

As a result the Domestic Arrival and International Arrival lines are the only lines displayed.

Passenger Traffic Comparison Month over Month

Shows all LAX passenger traffic for the designated time period compared to the previous year.

Something cool! - the row of icons at the top of the graph

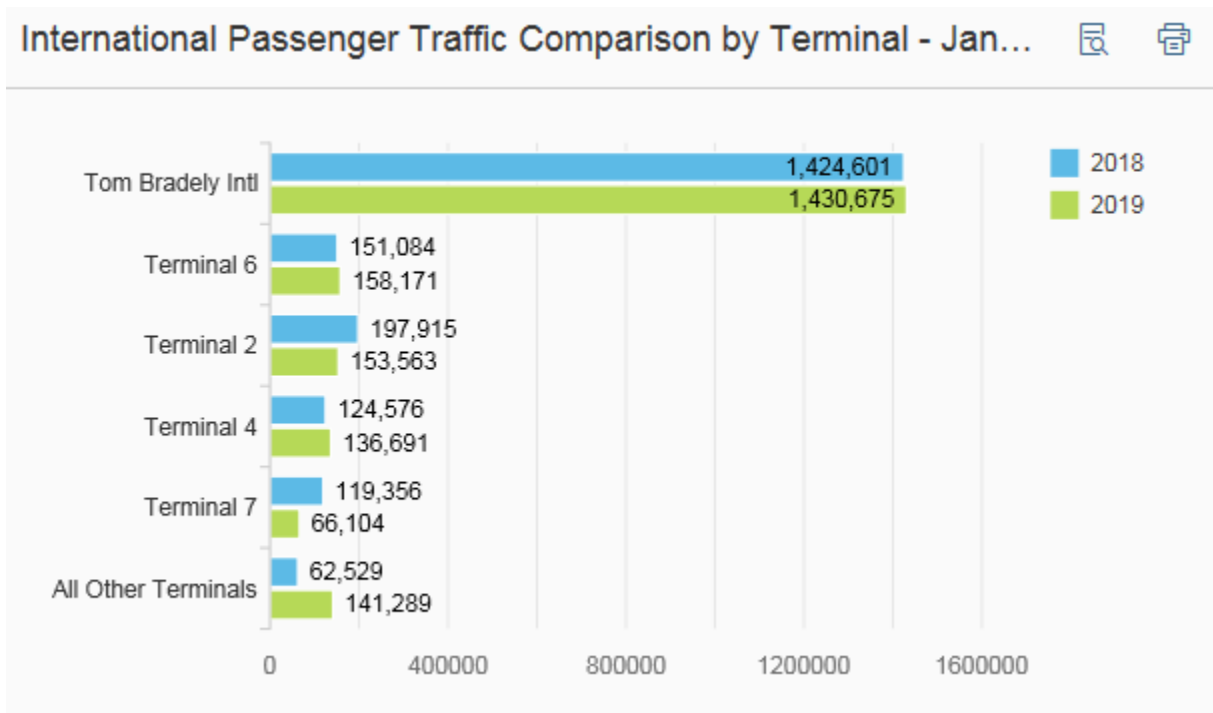

This icon allows you display the graph information in grid format.

Passenger Traffic Comparison Month over Month				
Passengers Traffic Totals	Feb 2017	Feb 2018	%Change	
Domestic	3,999,195	4,282,782	7.09	
International	1,605,077	1,760,497	9.68
