Copies of the foregoing notices may be obtained from the Department. The content of the foregoing notices is not incorporated herein.

#### **Recent Events**

#### Economic Volatility

The aviation industry as a whole and the level of aviation activity and enplaned passenger traffic at LAX specifically are dependent upon a variety of factors, including: (i) airline industry economics, including the cost and availability of labor, fuel, aircraft and insurance, (ii) competition among airlines and airports, including with respect to service, routes and ticket pricing and (iii) passenger demand for air travel. The economic condition of the industry is volatile, and the aviation industry has undergone significant changes, including mergers, acquisitions, bankruptcies and closures in recent years. Passenger airlines and global air cargo have been impacted by downturns in the global economy, increasing fuel costs, instability in the U.S. dollar, uncertainties in the Middle East and elsewhere and new security regulations. Aviation activity at LAX has slowed has slowed, or even decreased in recent months due to these issues.

Unless otherwise noted, the information provided in this Report is as of the Fiscal Year ended June 30, 2008. As of June 30, 2008, the global economy, the national economy and the economy of the region served by LAX showed signs of decline. Since June 30, 2008, these declines have increased significantly. As a result, commerce generally and aviation activity specifically, have experienced notable reductions since June 30, 2008. For example, total enplanements and deplanements at LAX for the ten months ended October 31, 2008 (partial calendar year 2008) as compared to the ten months ended October 31, 2007 (partial calendar year 2007) have decreased approximately 2.7% and for the same period, total air cargo has decreased approximately 9.2%. Also, total enplanements and deplanements at LAX for the period from July 1, 2008 to October 31, 2008 (partial fiscal year) as compared to July 1, 2007 to October 31, 2008 (partial fiscal year) have decreased approximately 5.6% and for the same period total air cargo has decreased by approximately 13.1%. See Table – "AIR TRAFFIC DATA," Table – "TOTAL REVENUE LANDED WEIGHT," Table – "CARGO TRAFFIC DATA AIR CARGO ON AND OFF," Table – "ENPLANED AND DEPLANED GARGO," Table – "HISTORICAL OPERATING STATEMENTS."

#### **Investment Practices of the City Treasurer**

The City Treasurer invests temporarily idle cash for the City, including that of the Department, as part of a pooled investment program (the "Pool") which combines general receipts with special funds for investment purposes and allocates interest earnings on a *pro rata* basis when the interest is earned and distributes interest receipts based on the previously established allocations.
