LEVEL OF SERVICE (LOS):				C			A						

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: Queue reported is the number of cars per lane.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: Queue reported is the number of cars per lane.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Manual Calculations

Intersection 86
CMA Methodology
Baseline (2010) Conditions A.M. Peak Hour

1) $\frac{433}{2}$ or $\frac{284}{2}$

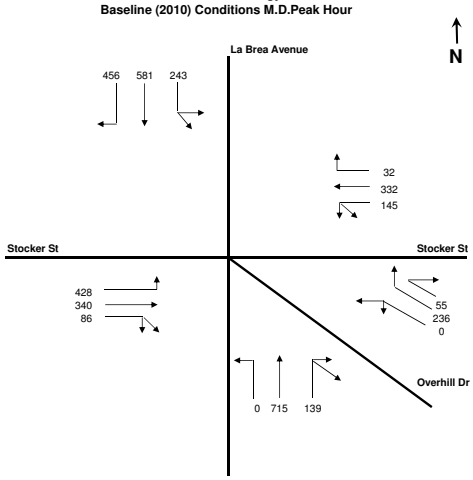
= **217**

2) $\frac{614}{2}$ or $\frac{24}{1}$ or $\left\{\frac{392 + 96}{2}\right\}$

= **307**

3) $\frac{523}{2}$ or $\frac{807}{3}$ or $\frac{239}{2}$

= **269**



4) $\frac{205}{2}$ or $\left\{\frac{428 + 56}{3}\right\}$

= **161**

Critical Volumes = 217 + 307 + 269 + 161 = 954

V/C = $\frac{954}{1,375}$ – 0.00 = 0.694 LOS B

Intersection 86
CMA Methodology
Baseline (2010) Conditions M.D.Peak Hour

1) $\frac{428}{2}$ or $\frac{145}{2}$

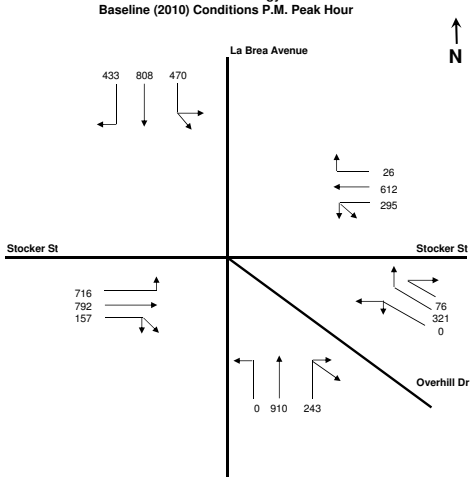
= **214**

2) $\frac{332}{2}$ or $\frac{32}{1}$ or $\left\{\frac{340 + 86}{2}\right\}$

= **213**

3) $\frac{581}{2}$ or $\frac{715}{3}$ or $\frac{139}{2}$

= **291**



4) $\frac{243}{2}$ or $\left\{\frac{236 + 55}{3}\right\}$

= **122**

Critical Volumes = 214 + 213 + 291 + 122 = 840

V/C = $\frac{840}{1,375}$ – 0.00 = 0.611 LOS B

Intersection 86
CMA Methodology
Baseline (2010) Conditions P.M. Peak Hour

1) $\frac{716}{2}$ or $\frac{295}{2}$

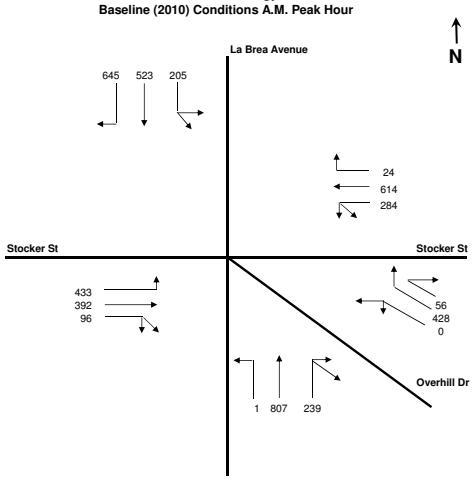
= **358**

2) $\frac{612}{2}$ or $\frac{26}{1}$ or $\left\{\frac{792 + 157}{2}\right\}$

= **475**

3) $\frac{808}{2}$ or $\frac{910}{3}$ or $\frac{243}{2}$

= **404**



4) $\frac{470}{2}$ or $\left\{\frac{321 + 76}{3}\right\}$

= **235**

Critical Volumes = 358 + 475 + 404 + 235 = 1,472

V/C = $\frac{1,472}{1,375}$ – 0.00 = 1.071 LOS F

Intersection 86
ICU Methodology
Baseline (2010) Conditions A.M. Peak Hour

1) $\frac{433}{3200}$ or $\frac{284}{3200}$

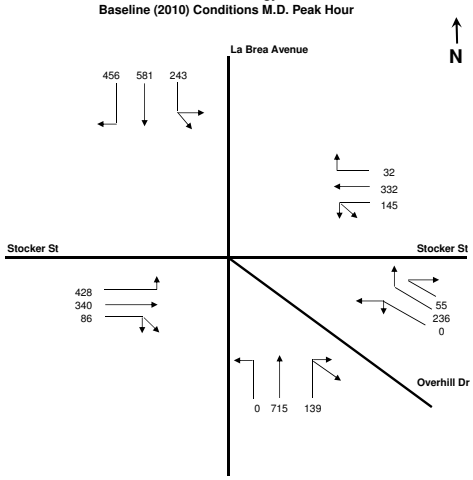
= **0.135**

2) $\frac{614}{3200}$ or $\frac{24}{1600}$ or $\left\{\frac{392 + 96}{3200}\right\}$

= **0.192**

3) $\frac{523}{3200}$ or $\frac{807}{4800}$ or $\frac{239}{3200}$

= **0.168**



4) $\frac{205}{3200}$ or $\left\{\frac{428 + 56}{4800}\right\}$

= **0.101**

Critical Volumes = 0.135 + 0.192 + 0.168 + 0.101 = 0.596

V/C = 0.596 — 0.00 = 0.596 LOS A

Intersection 86
ICU Methodology
Baseline (2010) Conditions M.D. Peak Hour

1) $\frac{428}{3200}$ or $\frac{145}{3200}$

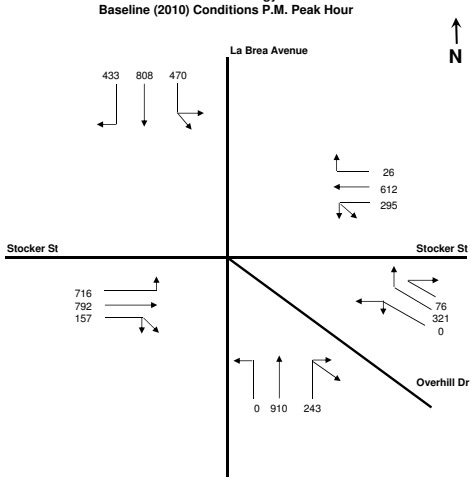
= **0.134**

2) $\frac{332}{3200}$ or $\frac{32}{1600}$ or $\left\{\frac{340 + 86}{3200}\right\}$

= **0.133**

3) $\frac{581}{3200}$ or $\frac{715}{4800}$ or $\frac{139}{3200}$

= **0.182**



4) $\frac{243}{3200}$ or $\left\{\frac{236 + 55}{4800}\right\}$

= **0.076**

Critical Volumes = 0.134 + 0.133 + 0.182 + 0.076 = 0.525

V/C = 0.525 — 0.00 = 0.525 LOS A

Intersection 86
ICU Methodology
Baseline (2010) Conditions P.M. Peak Hour

1) $\frac{716}{3200}$ or $\frac{295}{3200}$

= **0.224**

2) $\frac{612}{3200}$ or $\frac{26}{1600}$ or $\left\{\frac{792 + 157}{3200}\right\}$

= **0.297**

3) $\frac{808}{3200}$ or $\frac{910}{4800}$ or $\frac{243}{3200}$

= **0.253**

4) $\frac{470}{3200}$ or $\left\{\frac{321 + 76}{4800}\right\}$

= **0.147**

Critical Volumes = 0.224 + 0.297 + 0.253 + 0.147 = 0.921

V/C = 0.921 — 0.00 = 0.921 LOS E

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

LEVEL OF SERVICE (LOS):				E			A

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

LEVEL OF SERVICE (LOS):				A			A

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

LEVEL OF SERVICE (LOS):				C			A

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

V/C LESS ATSAC/ATCS ADJUSTMENT:			0.603			0.000
LEVEL OF SERVICE (LOS):			B			A

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.
