Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: Queue reported is the number of cars per lane.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Note: Queue reported is the number of cars per lane.

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in “Chapter 4.12.2 Off-Airport Surface Transportation” was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Manual Calculations

Intersection 86
CMA Methodology
Future (2025) With Alternative 1/2 A.M. Peak Hour

1) $\frac{510}{2}$ or $\frac{330}{2}$

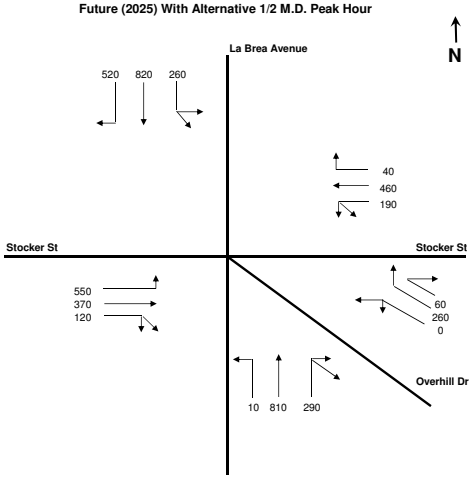
= **255**

2) $\frac{770}{2}$ or $\frac{30}{1}$ or $\left\{\frac{400 + 150}{2}\right\}$

= **385**

3) $\frac{770}{2}$ or $\frac{850}{3}$ or $\frac{350}{2}$

= **385**



4) $\frac{230}{2}$ or $\left\{\frac{430 + 80}{3}\right\}$

= **170**

Critical Volumes = 255 + 385 + 385 + 170 = 1,195

V/C = $\frac{1,195}{1,375}$ – 0.00 = 0.869 LOS D

Intersection 86
CMA Methodology
Future (2025) With Alternative 1/2 M.D. Peak Hour

1) $\frac{550}{2}$ or $\frac{190}{2}$

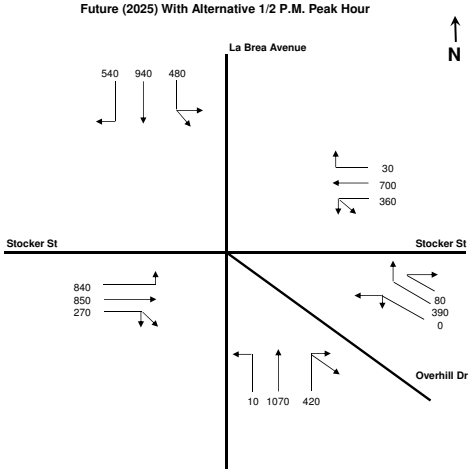
= **275**

2) $\frac{460}{2}$ or $\frac{40}{1}$ or $\left\{\frac{370 + 120}{2}\right\}$

= **245**

3) $\frac{820}{2}$ or $\frac{810}{3}$ or $\frac{290}{2}$

= **410**



4) $\frac{260}{2}$ or $\left\{\frac{260 + 60}{3}\right\}$

= **130**

Critical Volumes = 275 + 245 + 410 + 130 = 1,060

V/C = $\frac{1,060}{1,375}$ – 0.00 = 0.771 LOS C

Intersection 86
CMA Methodology
Future (2025) With Alternative 1/2 P.M. Peak Hour

1) $\frac{840}{2}$ or $\frac{360}{2}$

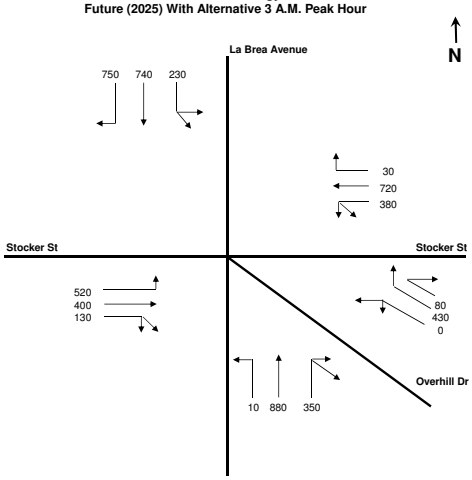
= **420**

2) $\frac{700}{2}$ or $\frac{30}{1}$ or $\left\{\frac{850 + 270}{2}\right\}$

= **560**

3) $\frac{940}{2}$ or $\frac{1070}{3}$ or $\frac{420}{2}$

= **470**



4) $\frac{480}{2}$ or $\left\{\frac{390 + 80}{3}\right\}$

= **240**

Critical Volumes = 420 + 560 + 470 + 240 = 1,690

V/C = $\frac{1,690}{1,375}$ – 0.00 = 1.229 LOS F

Intersection 86
CMA Methodology
Future (2025) With Alternative 3 A.M. Peak Hour

1) $\frac{520}{2}$ or $\frac{380}{2}$

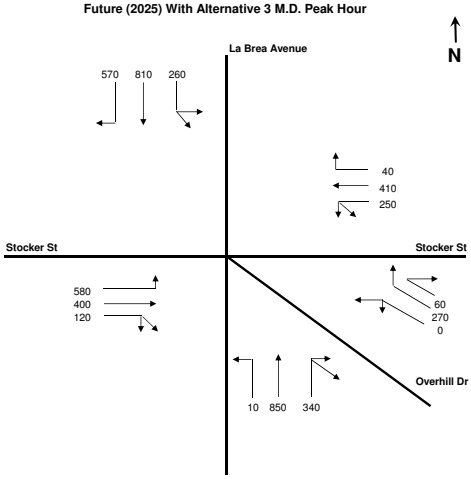
= **260**

2) $\frac{720}{2}$ or $\frac{30}{1}$ or $\left\{\frac{400 + 130}{2}\right\}$

= **360**

3) $\frac{740}{2}$ or $\frac{880}{3}$ or $\frac{350}{2}$

= **370**



4) $\frac{230}{2}$ or $\left\{\frac{430 + 80}{3}\right\}$

= **170**

Critical Volumes = 260 + 360 + 370 + 170 = 1,160

V/C = $\frac{1,160}{1,375}$ – 0.00 = 0.844 LOS D

Intersection 86
CMA Methodology
Future (2025) With Alternative 3 M.D. Peak Hour

1) $\frac{580}{2}$ or $\frac{250}{2}$

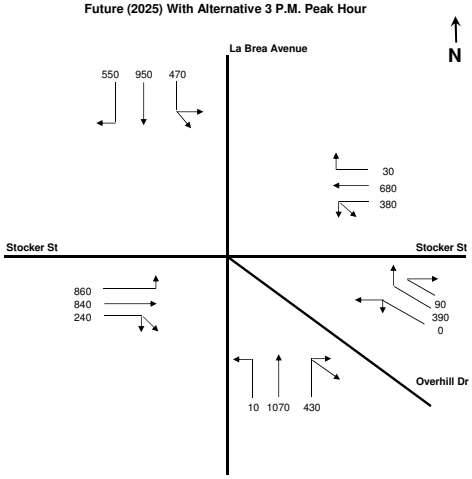
= **290**

2) $\frac{410}{2}$ or $\frac{40}{1}$ or $\frac{\{400 + 120\}}{2}$

= **260**

3) $\frac{810}{2}$ or $\frac{850}{3}$ or $\frac{340}{2}$

= **405**



4) $\frac{260}{2}$ or $\frac{\{270 + 60\}}{3}$

= **130**

Critical Volumes = 290 + 260 + 405 + 130 = 1,085

V/C = $\frac{1,085}{1,375}$ – 0.00 = 0.789 LOS C

Intersection 86
CMA Methodology
Future (2025) With Alternative 3 P.M. Peak Hour

1) $\frac{860}{2}$ or $\frac{380}{2}$

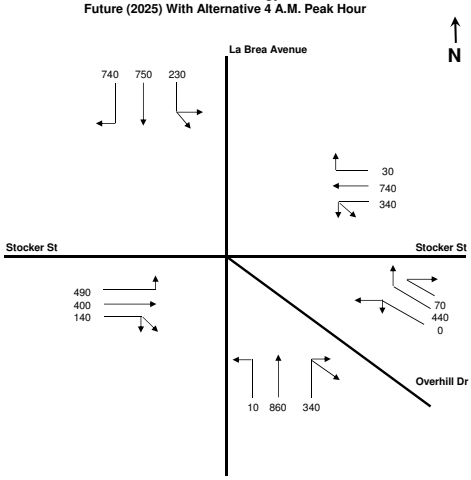
= **430**

2) $\frac{680}{2}$ or $\frac{30}{1}$ or $\frac{\{840 + 240\}}{2}$

= **540**

3) $\frac{950}{2}$ or $\frac{1070}{3}$ or $\frac{430}{2}$

= **475**



4) $\frac{470}{2}$ or $\frac{\{390 + 90\}}{3}$

= **235**

Critical Volumes = 430 + 540 + 475 + 235 = 1,680

V/C = $\frac{1,680}{1,375}$ – 0.00 = 1.222 LOS F

Intersection 86
CMA Methodology
Future (2025) With Alternative 4 A.M. Peak Hour

1) $\frac{490}{2}$ or $\frac{340}{2}$

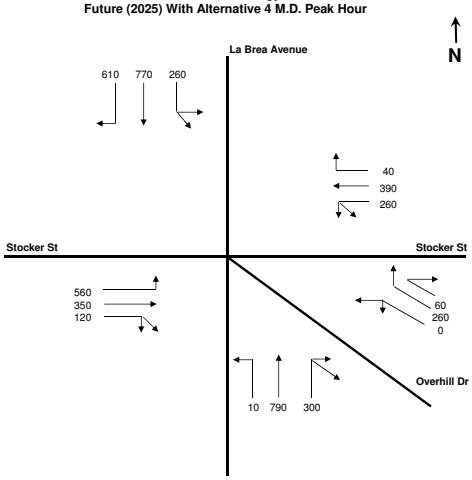
= **245**

2) $\frac{740}{2}$ or $\frac{30}{1}$ or $\frac{\{400 + 140\}}{2}$

= **370**

3) $\frac{750}{2}$ or $\frac{860}{3}$ or $\frac{340}{2}$

= **375**



4) $\frac{230}{2}$ or $\frac{\{440 + 70\}}{3}$

= **170**

Critical Volumes = 245 + 370 + 375 + 170 = 1,160

V/C = $\frac{1,160}{1,375}$ – 0.00 = 0.844 LOS D

Intersection 86
CMA Methodology
Future (2025) With Alternative 4 M.D. Peak Hour

1) $\frac{560}{2}$ or $\frac{260}{2}$

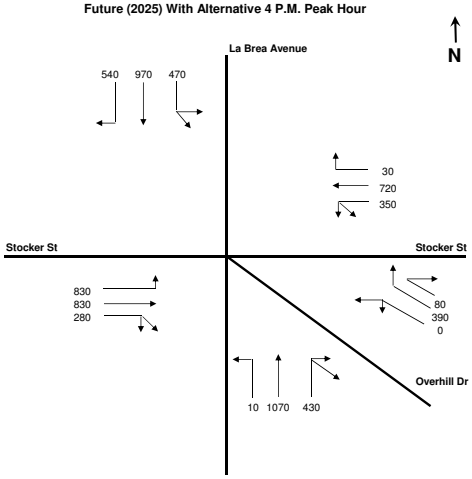
= **280**

2) $\frac{390}{2}$ or $\frac{40}{1}$ or $\frac{\{350 + 120\}}{2}$

= **235**

3) $\frac{770}{2}$ or $\frac{790}{3}$ or $\frac{300}{2}$

= **385**



4) $\frac{260}{2}$ or $\frac{\{260 + 60\}}{3}$

= **130**

Critical Volumes = 280 + 235 + 385 + 130 = 1,030

V/C = $\frac{1,030}{1,375}$ – 0.00 = 0.749 LOS C

Intersection 86
CMA Methodology
Future (2025) With Alternative 4 P.M. Peak Hour

1) $\frac{830}{2}$ or $\frac{350}{2}$

LEVEL OF SERVICE (LOS):				B			A						

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.

Version: 1i Beta; 8/4/2011

Note: For intersections that are fully or partially located in the City of Los Angeles, the final V/C values presented in "Chapter 4.12.2 Off-Airport Surface Transportation" was calculated based on the initial V/C from this worksheet, plus manual adjustment for ATSAC and/or ATCS credits. Specific V/C credit applied to each City of Los Angeles location can be found in Table 4.12.2-1.
