

Technical Report
LAX Master Plan Supplement to the Draft EIS/EIR

S-1. Supplemental Land Use Technical Report

June 2003

Prepared for:
Los Angeles World Airports
U.S. Department of Transportation
Federal Aviation Administration

Prepared by:
PCR Services Corporation

Table of Contents

1.	Introduction	1
2.	Affected Environment/Environmental Baseline	1
2.1	Regional Plans	1
2.1.1	SCAG 2001 Regional Transportation Plan (RTP)	1
2.1.2	South Coast Air Quality Management District (SCAQMD) Air Quality Management Plan (AQMP)	3
2.1.3	Caltrans Airport Land Use Planning Handbook	3
2.1.4	Los Angeles County Airport Land Use Plan (ALUP)	8
2.1.5	2001 Long Range Transportation Plan for Los Angeles County	8
2.2.	Local Plans and Policies	8
2.2.1	City of Los Angeles	8
2.2.2	City of Inglewood	10
2.3	Existing Incompatible Land Uses	11
2.3.1	2001 Noise Variance	11
2.3.2	Year 2000 CNEL	12
2.3.3	Single Event Noise Levels	20
3.	Environmental Consequences	25
3.1	No Action/No Project Alternative	25
3.1.1	Consistency with Land Use Plans	25
3.1.2	Noise	25
3.2	Alternative A	37
3.2.1	Westchester Business District	37
3.2.2	Consistency with Land Use Plans	39
3.2.3	Noise	40
3.3	Alternative B	53
3.3.1	Westchester Business District	53
3.3.2	Consistency with Land Use Plans	53
3.3.3	Noise	54
3.4	Alternative C	68
3.4.1	Westchester Business District	68
3.4.2	Consistency with Land Use Plans	68
3.4.3	Noise	70
3.5	Alternative D	83
3.5.1	Westchester Business District	83
3.5.2	Consistency with Land Use Plans	83
3.5.3	Noise	83
4.	Level of Significance After Incorporation of Mandatory Over-Ocean Procedures (Part 161)	106
4.1	Alternative A	106
4.1.1	Overall Noise Exposure	106
4.1.2	Newly Exposed Areas	109
4.2	Alternative B	117
4.2.1	Overall Noise Exposure	117
4.2.2	Newly Exposed Areas	121
4.3	Alternative C	129
4.3.1	Overall Noise Exposure	129
4.3.2	Newly Exposed Areas	130
4.4	Alternative D	141
4.4.1	Overall Noise Exposure	141
4.4.2	Newly Exposed Areas	145

List of Tables

Table S1	Comparison of Caltrans Handbook Suggested Land Use Compatibility Criteria	5
Table S2	Year 2000 Conditions CNEL Noise Contours Total Area Within Each	

	Jurisdiction	15
Table S3	Year 2000 Conditions CNEL Noise Contours Incompatible Residential and Noise-Sensitive Properties by Jurisdiction (Exposed to 65 dB CNEL or Greater Noise Levels)	15
Table S4	Year 2000 Conditions Incompatible Noise-Sensitive Uses (Exposed to 65 dB CNEL or Greater Noise Levels)	17

1. INTRODUCTION

The purpose of this *Supplemental Land Use Technical Report* is to provide additional information to support the conclusions presented in Section 4.2, *Land Use*, of the Supplement to the Draft EIS/EIR on the following issues for each alternative: new or updated regional and local plans and policies relevant to the LAX Master Plan that have occurred since publication of the Draft EIS/EIR, evaluation of the land use implications of aircraft noise compared to Year 2000 conditions, a new analysis of single event aircraft noise levels that could result in nighttime awakening or classroom disruption, and a focused discussion of potential impacts on the Westchester Business District (relative to Alternatives A, B, and C). Consistent with the methodology contained in Section 4.2, *Land Use*, (subsection 4.2.2), of the Draft EIS/EIR for Alternatives A through C, this document also includes an analysis of incompatible land uses resulting from exposure to the 65 Community Noise Equivalent Level (CNEL) or greater noise contours for Alternative D. Tables and figures are also presented for each build alternative to depict residential uses that would be newly exposed to high single event aircraft noise levels following incorporation of mandatory Over-Ocean Procedures (Part 161). Attachments A through F include listings of noise-sensitive receptors affected by high noise levels under Year 2000 conditions, the No Action/No Project Alternative, and Alternatives A through D.

2. AFFECTED ENVIRONMENT/ENVIRONMENTAL BASELINE

2.1 Regional Plans

The following discussion focuses on those plans that are new or revised since preparation of the Draft EIS/EIR.

2.1.1 SCAG 2001 Regional Transportation Plan (RTP)

The Draft EIS/EIR included a discussion of the 1998 RTP as it related to long-range aviation planning and LAX. Similar to the 1998 RTP, the 2001 RTP also proposes a decentralized regional aviation system. The Plan proposes development of aviation facilities where unmet demand is greatest and where population growth is expected to be significant in order to meet demand and reduce environmental impacts. The Plan also proposes various strategies to promote use of under-utilized facilities, including high-speed rail linkages between airports and market incentives.¹

With regard to regional aviation planning, and LAX in particular, the key difference between the 1998 RTP and 2001 RTP is the issue of LAX capacity. The Draft EIS/EIR and 1998 RTP previously identified the 2020 forecast for LAX as 94.2 million annual passengers (MAP). Under the 2001 RTP, no expansion is proposed at LAX beyond what can be accommodated by its existing physical capacity.

Although the horizon year was extended from 2020 to 2025, under the 2001 RTP, the guiding principles, recommendations, and policies remain the same as those referenced in the Draft EIS/EIR, Technical Report 1, *Land Use Technical Report*, of the Draft EIS/EIR. One minor revision was made to RTP Policy No. 6, deleting the previous reference to “transit restructuring” to read as follows:

- ◆ **Policy No. 6.** Implementing freight movements, advanced transportation technology, airport and seaport ground access and traveler information services, shall be RTP priorities.

As discussed below, the SCAG Regional Council developed an Aviation Task Force in 1998 in an effort to address the region’s passenger and air cargo demand.

SCAG is currently preparing the 2004 RTP which will include updates to passenger and cargo forecasts to account for the 30 MAP previously planned for the Orange County International Airport (formerly Marine Corps Air Station El Toro).

¹ Southern California Association of Governments, 2001 Regional Transportation Plan, April 2001, p. 18.

2.1.1.1 Regional Transportation Improvement Program

The Regional Transportation Improvement Program (RTIP) is the short-range program that implements the long-range RTP. Federal law requires that the RTIP be updated at least every two years and be consistent with the RTP. The RTIP implements the goals and objectives established in the RTP by identifying federal, state, and local funds for use in planning and building specific projects.

The most recent 2002 RTP was adopted by the SCAG Regional Council in August 2002 and approved by the federal agencies on October 4, 2002. The 2002 RTIP is a capital listing of all transportation projects proposed over a six-year period for the SCAG region (fiscal years 2003/03 - 2007/08).² The projects include a variety of projects, such as highway improvements, transit, rail and bus facilities, signal synchronization, intersection improvements, and freeway ramps.

The 2002 RTIP identifies the following two projects within the LAX vicinity: (1) the Arbor Vitae/I-405 Freeway interchange project (southern half), and (2) the addition of two HOV lanes and sound walls along I-405, between I-105 (Century Freeway) and Route 90 (Marina Freeway).³ The likely effect of these and other proposed transportation projects on local traffic and circulation patterns is discussed in Section 4.3.2, *Off-Airport Surface Transportation*, of the Supplement to the Draft EIS/EIR.

2.1.1.2 Regional Aviation Plan for the 2001 Regional Transportation Plan (RTP)

In 1998, the SCAG Regional Council developed an Aviation Task Force in an effort to address a number of regional aviation issues. This task force, with membership comprised of elected officials and aviation industry professionals, was formed to develop and evaluate aviation scenarios and provide policy recommendations to the Regional Council.

In August 2001 the Regional Council adopted one scenario as the Regional Aviation Plan.⁴ The 2001 Regional Aviation Plan, as a component of the RTP, detailed the following:

- ◆ Air passenger demand to nearly double, to 167 MAP;
- ◆ Air cargo demand to triple, to 9.5 million annual tons (MAT) in 2025;
- ◆ Existing capacity of 120 MAP, which without airport development would result in a capacity shortfall of 28 percent by 2005;
- ◆ A decentralized airport system, including former military air bases and joint use facilities rather than expand existing urbanized airports, that would shift the accommodation of future regional aviation demands to airports where the greatest growth in jobs and population is anticipated to occur over the next two decades.

As indicated for the 2001 RTP, the Regional Aviation Plan proposes no expansion at LAX beyond what can be accommodated through its existing physical capacity.

The Plan identifies critical regional aviation issues, such as regional aviation demand versus capacity, impact on roads from increased airport-related traffic (both cargo and passenger), LAX expansion in a built out urban environment, and local opposition to development of Marine Corps Air Station El Toro to meet Orange County's regional air traffic needs; and how these issues affect Plan implementation.

The Plan also demonstrates the degree to which Los Angeles County serves a disproportionate share of regional demand compared to county demand generated. For example, in 1997 Los Angeles County airports served 81 percent of regional demand but generated only 58 percent of regional demand.

While SCAG has broad federally mandated transportation planning powers, it has no aviation implementation power. However, the recently revived Southern California Regional Airport Authority has the ability to coordinate regional airport development with SCAG regional transportation planning.

² Southern California Association of Governments, Final 2002 Regional Transportation Improvement Program, August 2002, p. 1.

³ Southern California Association of Governments, Final 2002 Regional Transportation Improvement Program - Volume III, August 2002, Project ID 49160 and Project ID 11985, respectively.

⁴ Southern California Association of Governments, Regional Aviation Plan for the 2001 Regional Transportation Plan, August 2001.

Updates to the Regional Aviation Plan demand distribution analysis will be included in the 2004 RTP to reallocate the 30 MAP previously planned for Orange County International Airport (formerly Marine Corps Air Station El Toro).

2.1.2 South Coast Air Quality Management District (SCAQMD) Air Quality Management Plan (AQMP)

The AQMP sets forth a comprehensive program intended to bring the Southern California Air Basin (Basin) into compliance with federal and State air quality standards. In conjunction with SCAG, the SCAQMD is responsible for formulating and implementing air pollution control strategies. The 1997 AQMP was submitted to the California Air Resources Board for inclusion in the California State Implementation Plan (SIP), which was approved by the U.S. Environmental Protection Agency (USEPA). The overall control strategy in the AQMP provides the path to achieving emission reductions and air quality goals. Implementation is based on a series of control measures that vary by source type, such as stationary or mobile, as well as by the pollutant that is being targeted.

The 1997 AQMP was amended in 1999 due to litigation matters and was resubmitted to the USEPA, which approved the amended plan in April 2000. The 1999 Amendment provides additional short-term stationary source control measures that implement portions of the 1997 Ozone SIP long-term stationary source control measures. In addition, the Amendment revises the adoption and implementation schedule for the remaining 1997 Ozone SIP short-term stationary source control measures that SCAQMD is responsible to implement.

The 1997 PM₁₀ SIP was approved by California Air Resources Board (CARB) and submitted to the USEPA in February 1997. In order to expedite EPA's action on the 1997 PM₁₀ SIP, AQMD updated the Plan in 2002 with respect to the adoption and implementation schedule of various PM₁₀ related measures. The PM₁₀ SIP approval is expected by early 2003.

The AQMD is in the process of preparing a comprehensive AQMP update - the Proposed 2003 Air Quality Management Plan for the South Coast Air Basin. The 2003 AQMP seeks to demonstrate attainment with federal air quality standards and to make progress toward state standards. The 2003 AQMP will incorporate a revised emissions inventory, the latest modeling techniques, and updated control measures remaining from the 1997/1999 SIP as well as new control measures.⁵

The SIP component will revise the region's demonstration of attainment for both the federal one-hour ozone standard by 2010 and the federal PM₁₀ standard by 2006, as well as show maintenance of the federal carbon monoxide standard. Upon local, State, and federal approval, the 2003 Plan will replace the existing 1997/1999 Ozone SIP and 1997 PM₁₀ SIP for the South Coast, plus the 2002 Coachella Valley PM₁₀ Plan. The 2003 Plan will use more recent data on air quality, emissions, and modeling to assess attainment. It will also include an updated control strategy for both stationary and mobile sources, reflecting new measures for local, State, and federal implementation. Additional discussion of air quality standards and emission control measures as applied to airport operations and the proposed LAX Master Plan alternatives are described in Section 4.6, *Air Quality*, of the Supplement to the Draft EIS/EIR.

2.1.3 Caltrans Airport Land Use Planning Handbook

The California Airport Land Use Planning Handbook (2002 Caltrans Handbook) has been revised since the Draft EIS/EIR was prepared. The Section 4.2, *Land Use* (subsection 4.2.3), of the Draft EIS/EIR focused on the 1993 Caltrans Handbook. Although the 2002 Caltrans Handbook is similar in overall organization to the previous edition, new material is presented throughout the document. Generally, the 2002 Caltrans Handbook is more definitive in the guidance provided to the Airport Land Use Commission (ALUC), their staffs and consultants, the counties and cities having jurisdiction over airport area land uses, and airport proprietors.⁶

The overall purpose of the 2002 Caltrans Handbook is the same as previously stated in Section 4.2, *Land Use* (subsection 4.2.3), of the Draft EIS/EIR for the 1993 Caltrans Handbook. Table 2, Caltrans Handbook Suggested Land Use Compatibility Criteria in Technical Report 1, *Land Use Technical Report*,

⁵ South Coast Air Quality Management District, AQMD Website, available: <http://www.aqmd.gov/aqmp/03aqmp.htm>.

⁶ State of California, Department of Transportation, Division of Aeronautics, California Airport Land Use Planning Handbook, January 2002, p. Summary-1.

S-1. Supplemental Land Use Technical Report

of the Draft EIS/EIR, presented a summary of compatibility criteria for noise, safety, airspace protection, and overflight concerns as stated in the 1993 Caltrans Handbook. A revised summary of suggested compatibility criteria is presented in the 2002 Caltrans Handbook, in an expanded narrative form.⁷ A comparison of suggested compatibility criteria presented in the 2002 Caltrans Handbook to compatibility criteria presented in the 1993 Caltrans Handbook is identified in **Table S1**, Comparison of Caltrans Handbook Suggested Land Use Compatibility Criteria below:

⁷ State of California, Department of Transportation, Division of Aeronautics, California Airport Land Use Planning Handbook, January 2002, Table S1.

Table S1

Comparison of Caltrans Handbook Suggested Land Use Compatibility Criteria

Compatibility Concern	Suggested Compatibility Criteria (1993)	Suggested Compatibility Criteria (2002)
Noise	<ul style="list-style-type: none"> ◆ No residential within 65 dB CNEL contour. ◆ Encourage use of 60 dB CNEL as maximum for residential land uses in quiet communities (or even 55 dB at rural airports). 	<ul style="list-style-type: none"> ◆ No change. ◆ No change. ◆ The standard for interior noise levels of residential uses due to exterior noise sources should be 45 dB CNEL. ◆ Sound insulation should not be regarded as a mitigation measure that allows noise-sensitive land uses to be newly constructed in areas of high noise exposure. However, in areas where new construction of residential uses is unavoidable (e.g., due to infill or redevelopment) the following is recommended: <ul style="list-style-type: none"> - The need for sound insulation of new structures should be evaluated wherever exterior noise levels exceed 60 dB CNEL. - In any situation where sound insulation is required as a condition for development approval, ALUCs should require that an aviation easement be dedicated to the airport proprietor. - In no case should residential or noise-sensitive land uses be approved within an airport's current or future 65 dB CNEL noise contour unless an aviation easement addressing the noise impacts is dedicated to the airport proprietor.
Safety	<ul style="list-style-type: none"> ◆ Runway Protection Zones: <ul style="list-style-type: none"> - No structures. - No assemblages of people. - Encourage airports to own the property. ◆ Inner Safety Zones: <ul style="list-style-type: none"> - Preferably no residential uses or, at most, very low density. - Limit other uses to ones that attract relatively few people and leave substantial areas without structures. - Prohibit bulk storage of flammable or hazardous materials. - Prohibit schools, hospitals, nursing homes. - Maintain as much open land as possible by clustering of development. ◆ Inner Turning Zones: <ul style="list-style-type: none"> - Residential uses only at very low density. - Restrictions on other uses similar to Inner Safety Zone. ◆ Outer Safety Zones: <ul style="list-style-type: none"> - No urban density residential subdivisions. - Other uses limited to ones with moderate concentrations of people. - Avoid schools, hospitals, nursing homes. - Maintain as much open land as possible by clustering of development. ◆ Sideline Zones (Areas Adjacent to Runways): 	<ul style="list-style-type: none"> ◆ The definition of safety compatibility criteria must be done in unison with the delineation of safety compatibility zones. ◆ The principal safety compatibility strategy is to limit the number of people (residential densities and non-residential intensities) in the most risky locations near airports. Specific suggested criteria are included in Chapter 9 of the Caltrans Handbook. [Note : Chapter 9, p. 9-37 of the Caltrans Handbook includes a discussion of the previously referenced safety zones with an additional description of other factors to consider when defining safety zones.] ◆ To enhance the chances for survival of aircraft occupants in the event of an emergency off-airport landing, preservation of open land near airports is a desirable safety compatibility objective.

S-1. Supplemental Land Use Technical Report

Table S1

Comparison of Caltrans Handbook Suggested Land Use Compatibility Criteria

Compatibility Concern	Suggested Compatibility Criteria (1993)	Suggested Compatibility Criteria (2002)
	<ul style="list-style-type: none"> - All common aviation-related uses acceptable. - Limit non-aviation uses, on- or off-airport, to low-intensity activities. - Prohibit Schools, hospitals, nursing homes. ♦ Traffic Pattern Zone: <ul style="list-style-type: none"> - Avoid high-density residential unless clustered to leave open areas in between. - Avoid activities with very high concentrations of people. - Avoid schools, hospitals, nursing homes. 	
Airspace Protection	<ul style="list-style-type: none"> ♦ Limit heights of objects in accordance with Part 77 criteria. ♦ Avoid other hazards to flight anywhere in airport vicinity. 	<ul style="list-style-type: none"> ♦ FAR Part 77 criteria provides the basic guidance for restrictions on the heights of objects near airports. Allowances need to be made for areas of high terrain. Also, heights associated with normal use of a property generally should be permitted unless aviation easements are obtained. ♦ FAA aeronautical studies conducted in accordance with FAR Part 77 are address only airspace hazards, not hazards to people and property on the ground. Therefore, an FAA determination of "no hazard" for proposed construction does not determine safety and noise impacts. ♦ Land uses that produce increased attraction of birds should be avoided. Activities likely to create visual or electronic hazards to flight (distracting lights, glare, interference with aircraft instruments or radio communication) also should be avoided.
Overflight	<ul style="list-style-type: none"> ♦ Establish some form of buyer awareness program. 	<ul style="list-style-type: none"> ♦ Measures that alert prospective buyers to the existence of overflight impacts are appropriate for all parts of the airport influence area. ♦ Recording of deed notices describing airport impacts should be required as a condition for development approval anywhere in the airport influence area where aviation easements are not obtained. ♦ ALUCs are encouraged to adopt policies defining the area within which information regarding airport noise impacts should be disclosed as part of real estate transactions. ♦ Aviation easements also serve a buyer awareness function. However, requirements for their dedication as a condition for development approval should be limited to locations where high noise levels exist or are projected to occur and/or the heights of objects need to be significantly restricted.

Source: Hodges & Shutt, December 1993; Shutt Moen Associates, January 2002; PCR 2002.

Airport noise compatibility policies referenced in the 2002 Caltrans Handbook were compared against those policies previously referenced in the 1993 Caltrans Handbook for any material changes that would affect the conclusions presented in Section 4.2, *Land Use* (subsection 4.2.6), of the Draft EIS/EIR. The 2002 Caltrans Handbook includes additional information and recommendations to address the effects of high noise levels on learning and sleep disturbance. This recent information was based on studies conducted by The Federal Interagency Committee on Aviation Noise (FICAN), a committee formed in 1993 as a result of a Federal Interagency Committee on Noise (FICON) recommendation that a standing interagency committee be created for the purpose of facilitating research into aviation noise issues. FICAN member agencies include the U.S. Air Force, U.S. Army, U.S. Navy, Federal Aviation Administration (FAA), National Aeronautics and Space Administration, National Parks Service, U.S.

Environmental Protection Agency, Department of Housing and Urban Development, and Centers for Disease Control and Prevention.⁸

As stated in the 2002 Caltrans Handbook,⁹ regarding single event aircraft noise levels and land use compatibility, no definitive, widely recognized guidelines currently exist.¹⁰ The single event noise research that has been conducted has primarily focused on learning disruption and sleep disturbance. Impacts on communities from single event noise levels can be reduced by restrictions on aircraft operations through the adoption of land use restrictions, or defining altitude limits to reduce low-altitude aircraft overflights. The Caltrans Handbook recommended limiting the use of single-event noise data to three circumstances:

- ◆ In supplemental evaluation of noise-sensitive land uses, such as schools and outdoor theaters;
- ◆ As considerations in the design of acoustical treatment of buildings;
- ◆ As one of the factors to consider in determining the geographic extent of an area affected by aircraft noise.

FICAN has identified a strong relationship between noise and children's reading ability. In addition, the FAA Order 51000.38A, Section 712.c establishes a design objective of L_{eq} 45 dB during normal school hours for school sound insulation projects for noise resulting from aircraft operations.¹¹ The standards established in Section 4.1, *Noise* (subsection 4.1.4.1.1) of the Supplement to the Draft EIS/EIR for single event noise analysis in the LAX environs are independent of, and more restrictive than, the referenced design objective established under FAA Order 51000.38A. For example, Section 4.1, *Noise* (subsection 4.1.4.1.1), of the Supplement to the Draft EIS/EIR, uses a more restrictive standard of 35 dB ($L_{eq(h)}$) interior noise levels as one threshold of significance for single event noise levels in schools, based on recently released (summer of 2002) American National Standards Institute (ANSI) standards for interior classroom noise levels. The methodology and thresholds used to determine impacts of single event noise levels on residential and school uses have been developed in response to the California Appellate Court's ruling¹² that single events must be evaluated in the assessment of noise levels related to airport projects, as further described in Section 4.1, *Noise* (subsection 4.1.6.1), of the Supplement to the Draft EIS/EIR. Impacts of high single event aircraft noise levels on schools that result in classroom disruption are further analyzed in Section 4.1, *Noise* (subsection 4.1.6.1), in the Supplement to the Draft EIS/EIR. The conclusions presented in Section 4.1, *Noise* (subsection 4.1.6.1), are summarized in Section 4.2, *Land Use* (subsection 4.2.6) of the Supplement to the Draft EIS/EIR.

Based on a 1997 study conducted by FICAN to measure indoor sound exposure levels on sleep disturbance, an indoor sound exposure level (SEL) of approximately 81 dB is predicted to result in approximately 10 percent of nighttime awakenings.¹³ This is consistent with the threshold of 94 dB SEL for exterior noise levels stated in Section 4.1, *Noise* (subsection 4.1.4.1.1) of the Supplement to the Draft EIS/EIR. Recommendations to reduce the impact of high single event noise levels on noise sensitive uses include adopting land use restrictions, extending the area where acoustical treatment of buildings is required, and proposing Part 161 aircraft operation restrictions (as described in Section 4.1, *Noise* (subsection 4.1.8), and Section 4.2, *Land Use* (subsection 4.2.8), of the Supplement to the Draft EIS/EIR). The extent of residential uses exposed to existing and future high nighttime noise levels of 94 dBA SEL are analyzed in Section 4.1, *Noise* (subsection 4.1.6.1), and Section 4.2, *Land Use* (subsection 4.2.6), and in this technical report of the Supplement to the Draft EIS/EIR.

The 2002 Caltrans Handbook also recommends limiting airport noise impacts through the following measures: source noise reduction, operational limitations, preventative measures, and remedial actions.

⁸ State of California, Department of Transportation, Division of Aeronautics, California Airport Land Use Planning Handbook, January 2002, pp. 7-5 and 7-6.

⁹ As referenced in the 2002 Caltrans Handbook and further described in Section 4.2, *Noise*, (subsection 4.1.2), of the Supplement to the Draft EIS/EIR, these studies include "Effects of Aviation Noise Awakenings from Sleep" (Federal Interagency Committee Cover on Noise, 1997) and Federal Agency Review of Selected Airport Noise Analysis Issues (Federal Interagency Committee on Noise, August, 1992).

¹⁰ State of California, Department of Transportation, Division of Aeronautics, California Airport Land Use Planning Handbook, January 2002, pp. 7-39.

¹¹ State of California, Department of Transportation, Division of Aeronautics, California Airport Land Use Planning Handbook, January 2002, p. 7-9.

¹² Berkeley Keep Jets Over the Bay Committee v. Board of Port Commission, (2001) 91 Cal.App.4th 1344.

¹³ State of California, Department of Transportation, Division of Aeronautics, California Airport Land Use Planning Handbook, January 2002, p. 7-10.

S-1. Supplemental Land Use Technical Report

Existing and proposed measures to reduce aircraft noise impacts on noise-sensitive uses are described in Section 4.1, *Noise* (subsection 4.1.8), and Section 4.2, *Land Use* (subsection 4.2.8), of the Supplement to the Draft EIS/EIR.

2.1.4 Los Angeles County Airport Land Use Plan (ALUP)

Although no changes have occurred to the ALUP, as described in Section 4.2, *Land Use* (subsection 4.2.3), and Technical Report 1, *Land Use Technical Report*, of the Draft EIS/EIR, an Airport Comprehensive Land Use Plan (CLUP) is currently being prepared. The CLUP will first be prepared for the Foxfield Airport, but will also include policies applicable to all County airports, in conformance with recommendations provided in the 2002 Caltrans Handbook. A Draft CLUP for the Foxfield Airport is scheduled to be reviewed by the Airport Land Use Commission by August 2003.¹⁴

2.1.5 2001 Long Range Transportation Plan for Los Angeles County

On April 26, 2001 the Metropolitan Transportation Authority (MTA) Board adopted the Long Range Transportation Plan (LRTP). The LRTP is a 25-year blueprint for transportation planning in Los Angeles County through the year 2025. The LRTP assesses future population increases projected for the county and what such increases will mean for future mobility needs. The Plan makes recommendations with regard to what can be done with anticipated revenues, as well as what can be done if additional revenues become available.

The LRTP recommends a balanced transportation program with a strong emphasis on public transit to meet growth in travel. Regarding roadway capacity, the Plan proposes to complete the countywide HOV lane system, a countywide traffic signal coordination system, interchange improvements (to include the Arbor Vitae/I-405 Freeway interchange project - southern half) and grade separations.

A discussion of consistency of the build Alternatives with the LRTP is provided in Section 4.3.2, *Off-Airport Surface Transportation*, of the Supplement to the Draft EIS/EIR.

2.2. Local Plans and Policies

2.2.1 City of Los Angeles

2.2.1.1 Framework Element

Relevant objectives and policies of the Framework Element as they pertain to LAX and collateral development are presented in Technical Report 1, *Land Use Technical Report*, of the Draft EIS/EIR. Since original adoption of the Framework Element in 1996, this document was subject to legal challenge due to conclusions regarding the significance of air quality impacts. As a result, new CEQA Findings and Statement of Overriding Considerations were adopted and the Framework Element was readopted on August 2001. This legal action did not change the contents of the 1996 Framework Element and the City considers the readopted Framework Element a valid planning document. Therefore, the information presented in Section 4.2, *Land Use* (subsection 4.2.6), of the Draft EIS/EIR has not changed.¹⁵

2.2.1.2 Bicycle Plan

The location and type of existing bicycle facilities in the vicinity of LAX and relevant policies are presented in Technical Report 1, *Land Use Technical Report*, of the Draft EIS/EIR. Since publication of the Draft EIS/EIR, a Technical Update to the Bicycle Plan was adopted by City Council on June 7, 2002. This update includes a map of Existing and Funded Bikeways and revised maps of the Citywide Bikeway System.¹⁶ The existing bikeways in the vicinity of LAX include the following additions from the discussion

¹⁴ Mark Child, Principal Regional Planning Assistant, Los Angeles County Department of Regional Planning, [personal communication](#), January 7, 2003.

¹⁵ Herman Van Buren, Senior City Planner, City of Los Angeles, [personal communication](#) December 5, 2002 and General Plan Framework Element Resolution of Adoption (CF 01-1162, 95-2259), August 8, 2001.

¹⁶ City of Los Angeles Planning Department, [City of Los Angeles Bicycle Plan A Part of the Transportation Element the General Plan](#), originally adopted by City Council August 6, 1996, Technical Update adopted by City Council June 7, 2002, Appendix F and Map B2.

presented in Section 4.2, *Land Use* (subsection 4.2.3), of the Draft EIS/EIR, p. 4-105: a Class II Bike Lane along Sepulveda Boulevard between Centinela Avenue and Manchester Avenue, and a Class II Bike Lane along Manchester Avenue between Lincoln Boulevard and Sepulveda Boulevard. A Class II funded bike lane is generally identified along Teale Street between Lincoln Boulevard and south of Centinela Avenue.¹⁷ This facility is located at the northern perimeter, and just outside of, the Study Area. The Bicycle Plan Citywide Bikeways System Westside Geographical Area¹⁸ identifies several existing and future Class I and II bikeways in the vicinity of LAX. These facilities are generally consistent with the information presented in the Draft EIS/EIR; however the revised Plan identifies and describes an existing Class I Bike Path along Imperial Highway that extends from Vista Del Mar to Hillcrest Street and becomes a Class II Bike Lane between Hillcrest Street and Aviation Boulevard. Although this bicycle path was described in Section 4.2, *Land Use*, of the Draft EIS/EIR, it was not presented as part of the Bicycle Plan. Since the bicycle facilities along Sepulveda Boulevard, Manchester Avenue, and Imperial Highway were considered in the analysis contained in the Draft EIS/EIR, these update to existing and proposed bicycle facilities are minor modifications to provide clarification and would not alter the analysis or conclusions presented in Section 4.2, *Land Use* (subsection 4.2.6), of the Draft EIS/EIR.

2.2.1.3 Westchester-Playa del Rey Community Plan

The Community Plan land use, zoning designations, and references relevant to the LAX Master Plan are described in Technical Report 1, *Land Use Technical Report*, of the Draft EIS/EIR. No major zone changes or plan changes have occurred since publication of the Draft EIS/EIR. However, the Westchester - Playa del Rey Community Plan is being revised as part of a Citywide Community Plan Update Program. A draft Plan is scheduled for public release in mid-May with final Plan approval anticipated in the fall of 2003.

2.2.1.4 Coastal Transportation Corridor Specific Plan

The Los Angeles Coastal Transportation Corridor Specific Plan (adopted under Ordinance No. 168,999 on September 22, 1993) is contained in the Westchester-Playa del Rey Community Plan and enforced by the City of Los Angeles Department of Transportation. The Coastal Transportation Corridor Specific Plan has been formulated to specifically mitigate the traffic impacts of new development proposed within the plan study area. No changes have occurred to this Plan as described in Section 4.2, *Land Use* (subsection 4.2.3), of the Draft EIS/EIR, although a technical update to establish Citywide procedures and standards for processing specific plans was recently approved under Ordinance No. 173,445 and, as a result, would affect implementation of this plan.¹⁹

2.2.1.5 South Los Angeles Community Plan

Formerly referred to as the South Central Los Angeles Community Plan, the name of this plan was changed to the South Los Angeles Community Plan in response to a request by the Education and Neighborhood Committee to discontinue the use of the term "South Central Los Angeles" and replace the phrase with the term "South Los Angeles" on City documents. This request was adopted by City Council on April 22, 2003. In addition, the South Los Angeles Community Plan was revised on March 22, 2000 as part of a comprehensive Citywide Community Plan Update Program and reflects community concerns about managing new development and preserving positive characteristics of existing uses. Although this Plan was recently revised, the general description of the community plan and zoning designations for that portion of the Plan located within the Study Area is the same as presented in Technical Report 1, *Land Use Technical Report*, of the Draft EIS/EIR.

Relevant policies to promote land use compatibility and preserve housing stock included the following²⁰:

- ◆ **1-1.2** Protect existing single-family and low-density residential neighborhoods from encroachment by higher density residential and other incompatible uses.

¹⁷ City of Los Angeles Planning Department, City of Los Angeles Bicycle Plan A Part of the Transportation Element the General Plan, originally adopted by City Council August 6, 1996, Technical Update adopted by City Council June 7, 2002, Appendix F.

¹⁸ City of Los Angeles Planning Department, City of Los Angeles Bicycle Plan A Part of the Transportation Element the General Plan, originally adopted by City Council August 6, 1996, Technical Update adopted by City Council June 7, 2002, Map B2.

¹⁹ In addition, adjust the trip cost factor is adjusted annually. The current factor is \$5,514/trip (Manuel Anaya, Transportation Engineering Associate, City of Los Angeles, Department of Transportation, personal communication January 7, 2003).

²⁰ City of Los Angeles Planning Department, South Central Los Angeles Community Plan Area, adopted by City Council March 22, 2000.

S-1. Supplemental Land Use Technical Report

- ◆ **1-1.4** Maintain at least 43% of residential lands designated for single-family uses.
- ◆ **1-3.2** Consider factors such as neighborhood character and identity, compatibility of land uses, impact on livability, impacts on service and public facilities, and impacts on traffic levels when changes in residential densities are proposed.
- ◆ **1-5.2** Ensure that new housing opportunities minimize the displacement of the residents.
- ◆ **2-1.1** New commercial uses shall be located in existing, established commercial areas or existing shopping centers.
- ◆ **2-1.2** Protect commercially planned/zoned areas from encroachment by residential only development.

Although these policies are more detailed than the policies contained in the previous Plan, the basic intent of preserving existing single-family structures and promoting land use compatibility remains the same and therefore would not alter the conclusions previously presented in Section 4.2, *Land Use* (subsection 4.2.6), of the Draft EIS/EIR.

2.2.1.6 West Adams-Baldwin Hills-Leimert Community Plan

No update to the West Adams-Baldwin Hills Leimert Community Plan has occurred since publication of the Draft EIS/EIR.²¹ Within the Community Plan area, the Crenshaw Corridor Specific Plan was recently adopted on November 1, 2002 to promote standards for development along the Crenshaw Corridor. The Crenshaw Corridor extends along Crenshaw Boulevard from the Santa Monica Freeway to the north to Florence Avenue to the south. Although Crenshaw Boulevard and Florence Avenue are located at the northernmost boundary of the Study Area, development of the LAX Master Plan would not have an effect on the Design Standards contained within this Specific Plan. Therefore the adoption of this Specific Plan would not alter any of the analysis or conclusions previously presented in Section 4.2, *Land Use* (subsection 4.2.6), of the Draft EIS/EIR.

2.2.2 City of Inglewood

2.2.2.1 Inglewood Housing Element

The City of Inglewood is in the process of updating the 1992 Housing Element (amended in 1993). The Housing Element was adopted by the Planning Commission in October 2002 and the City Council in December 2002. However, the City is awaiting approval from the State Department of Housing and Community Development (anticipated summer of 2003). The seventh objective of the adopted and draft Housing Element is "...to reduce the adverse impact of aircraft noise in residential areas."²² As indicated in the Draft Housing Element, in accordance with the Aircraft Noise Mitigation Program (ANMP), in the 10-year period between January 1989 and 1999, a total of 1,928 dwelling units have been removed from the La Cienega, Century, and North Inglewood Industrial Park redevelopment project areas, and 1,914 units have been replaced. The La Cienega Redevelopment area is located generally between La Cienega Boulevard west to the railroad tracks between Arbor Vitae Street and Florence Avenue. The North Inglewood Industrial Park Project area is located between La Brea Avenue and Hyde Park Boulevard between Florence Avenue and West Beach Avenue. The removal of residential uses from the La Cienega and the North Inglewood Industrial Park Project is nearly completed. The Century Redevelopment area is irregularly shaped and is located generally between Prairie Avenue and Crenshaw Boulevard and extends as far south as 104th Street. The northern boundary is generally Manchester Avenue although portions of the area extend to the north of Manchester Avenue and east of Crenshaw Boulevard. The Draft Housing Element states that the Century project may be expanded in the future to include more noise-impacted areas south of Century Boulevard.

2.2.2.2. Memorandum of Understanding

Since publication of the Draft EIS/EIR, a Memorandum of Understanding (MOU) was agreed to between the City of Los Angeles and the City of Inglewood²³ to cooperate in pursuing and implementing certain measures designed to study and mitigate the possible environmental impacts on Inglewood of existing

²¹ Faisal Roble, City Planner, City of Los Angeles, Department of City Planning, personal communication, December 4, 2002.

²² City of Inglewood, adopted Housing Element, 1993 (amended) p. 79; Draft Housing Element, 2000, p. 157.

²³ Memorandum of Understanding between the City of Los Angeles and the City of Inglewood, approved February 6, 2001.

and potential future operations and improvements at LAX. The MOU includes the following provisions for the study and implementation of LAWA's noise mitigation programs:

- ◆ Suspension of Avigation Easement Requirements. In order to promote the cooperation between LAWA and Inglewood, LAWA has agreed to suspend its requirement that such avigation easements (that waive the right of a homeowner to sue LAWA) be executed by homeowners receiving LAWA-provided noise insulation benefits for Inglewood residences. This suspension of avigation easement requirements has been granted by Caltrans. In lieu of requiring avigation easements, existing and future homeowners within the 65 dB CNEL noise contour will be notified regarding the existence and significance of such noise impacts. This notification process is currently in effect.
- ◆ Pilot Program for Noise Insulation in Certain Residences. On a pilot project basis, LAWA and Inglewood will study the feasibility of providing noise insulation benefits to certain areas where residences would not otherwise qualify. This program is being considered by LAWA at this time.
- ◆ Air Conditioning in all Noise Insulated Residences. LAWA will continue to provide air conditioning systems to residences that are being insulated.
- ◆ New Part 150 Noise Study: Noise Exposure Maps and Over-the-Ocean Night Take-Off Requirements. LAWA will consider publishing updated noise exposure maps and initiate a new Part 150 study to investigate alternative means to obtaining compliance with over-the-ocean takeoff requirements, particularly at night. This issue is currently part of the LAX Community Noise Roundtable Work Program.
- ◆ New Part 161 Noise Study: Mandatory Compliance with LAX Night-Time Over-Ocean Policies and Procedures. LAWA will initiate a Part 161 Study to obtain FAA approval of various penalties that can be imposed on airlines whose flights violate the existing LAX night-time over-ocean policies and procedures. This issue is currently part of the LAX Community Noise Roundtable Work Program.²⁴
- ◆ Aircraft Noise Task Force. LAWA will establish an Aircraft Noise Task Force (to include representatives identified by Inglewood) in order to bring interested parties together to discuss apparent curfew violations, proposed curfew violations penalties, and other LAX noise-related matters. The LAX Community Noise Roundtable was created by LAWA to address community concerns about noise-related issues. Members include representatives from the City of Inglewood.

2.3 Existing Incompatible Land Uses

2.3.1 2001 Noise Variance

LAX operates under a variance to the California Airport Noise Standards (Noise Standards) that was recently extended on March 21, 2001 for a period of three years (ending March 21, 2004). The variance is valid for a three-year period, can be extended so long as LAWA demonstrates that programs are being implemented to reduce noise impacts to an acceptable degree over a reasonable period of time.

Specifically the 2001 Noise Variance includes the following terms and conditions:

- ◆ LAX shall continue to implement its ANMP initiated pursuant to the Caltrans' previous decision regarding this matter. LAX, with the assistance of the affected local jurisdictions, shall update the entire ANMP from time to time to ensure that it reasonably represents the mitigation and funding programs that are in place, being implemented, or proposed for future implementation. The ANMP shall be designed to ultimately fund the mitigation of all incompatible land uses within the noise impact boundary as defined in the state noise standards. LAX shall use its best efforts to complete the acoustical treatment portion of the ANMP within seven years from the effective date of this decision, funding and capabilities of the affected jurisdictions permitting.
- ◆ LAX, with the assistance of the affected local jurisdictions, shall prepare an annual update of the numbers and tabular information within the ANMP that show the annual funding available to each

²⁴ The LAX Community Noise Roundtable was created by LAWA in September 2000 to reduce and mitigate adverse noise impacts from LAX operations on the surrounding communities. Members of the Roundtable consists of County Board of Supervisors or City Council members representing portions of the County of Los Angeles (i.e., the 2nd and 4th Districts), the City of Los Angeles, Manhattan Beach, Hermosa Beach, Inglewood, Montebello, Monterey Park, Torrance, Rancho Palos Verdes, and Palos Verdes Estates. In addition, other government agencies and groups are represented such as the Federal Aviation Administration, LAWA Management, Airline Transportation Association, LAX Area Advisory Committee, Westchester Playa del Rey Council and P.A.N.I.C. (Peninsula Aircraft Noise/Safety Council).

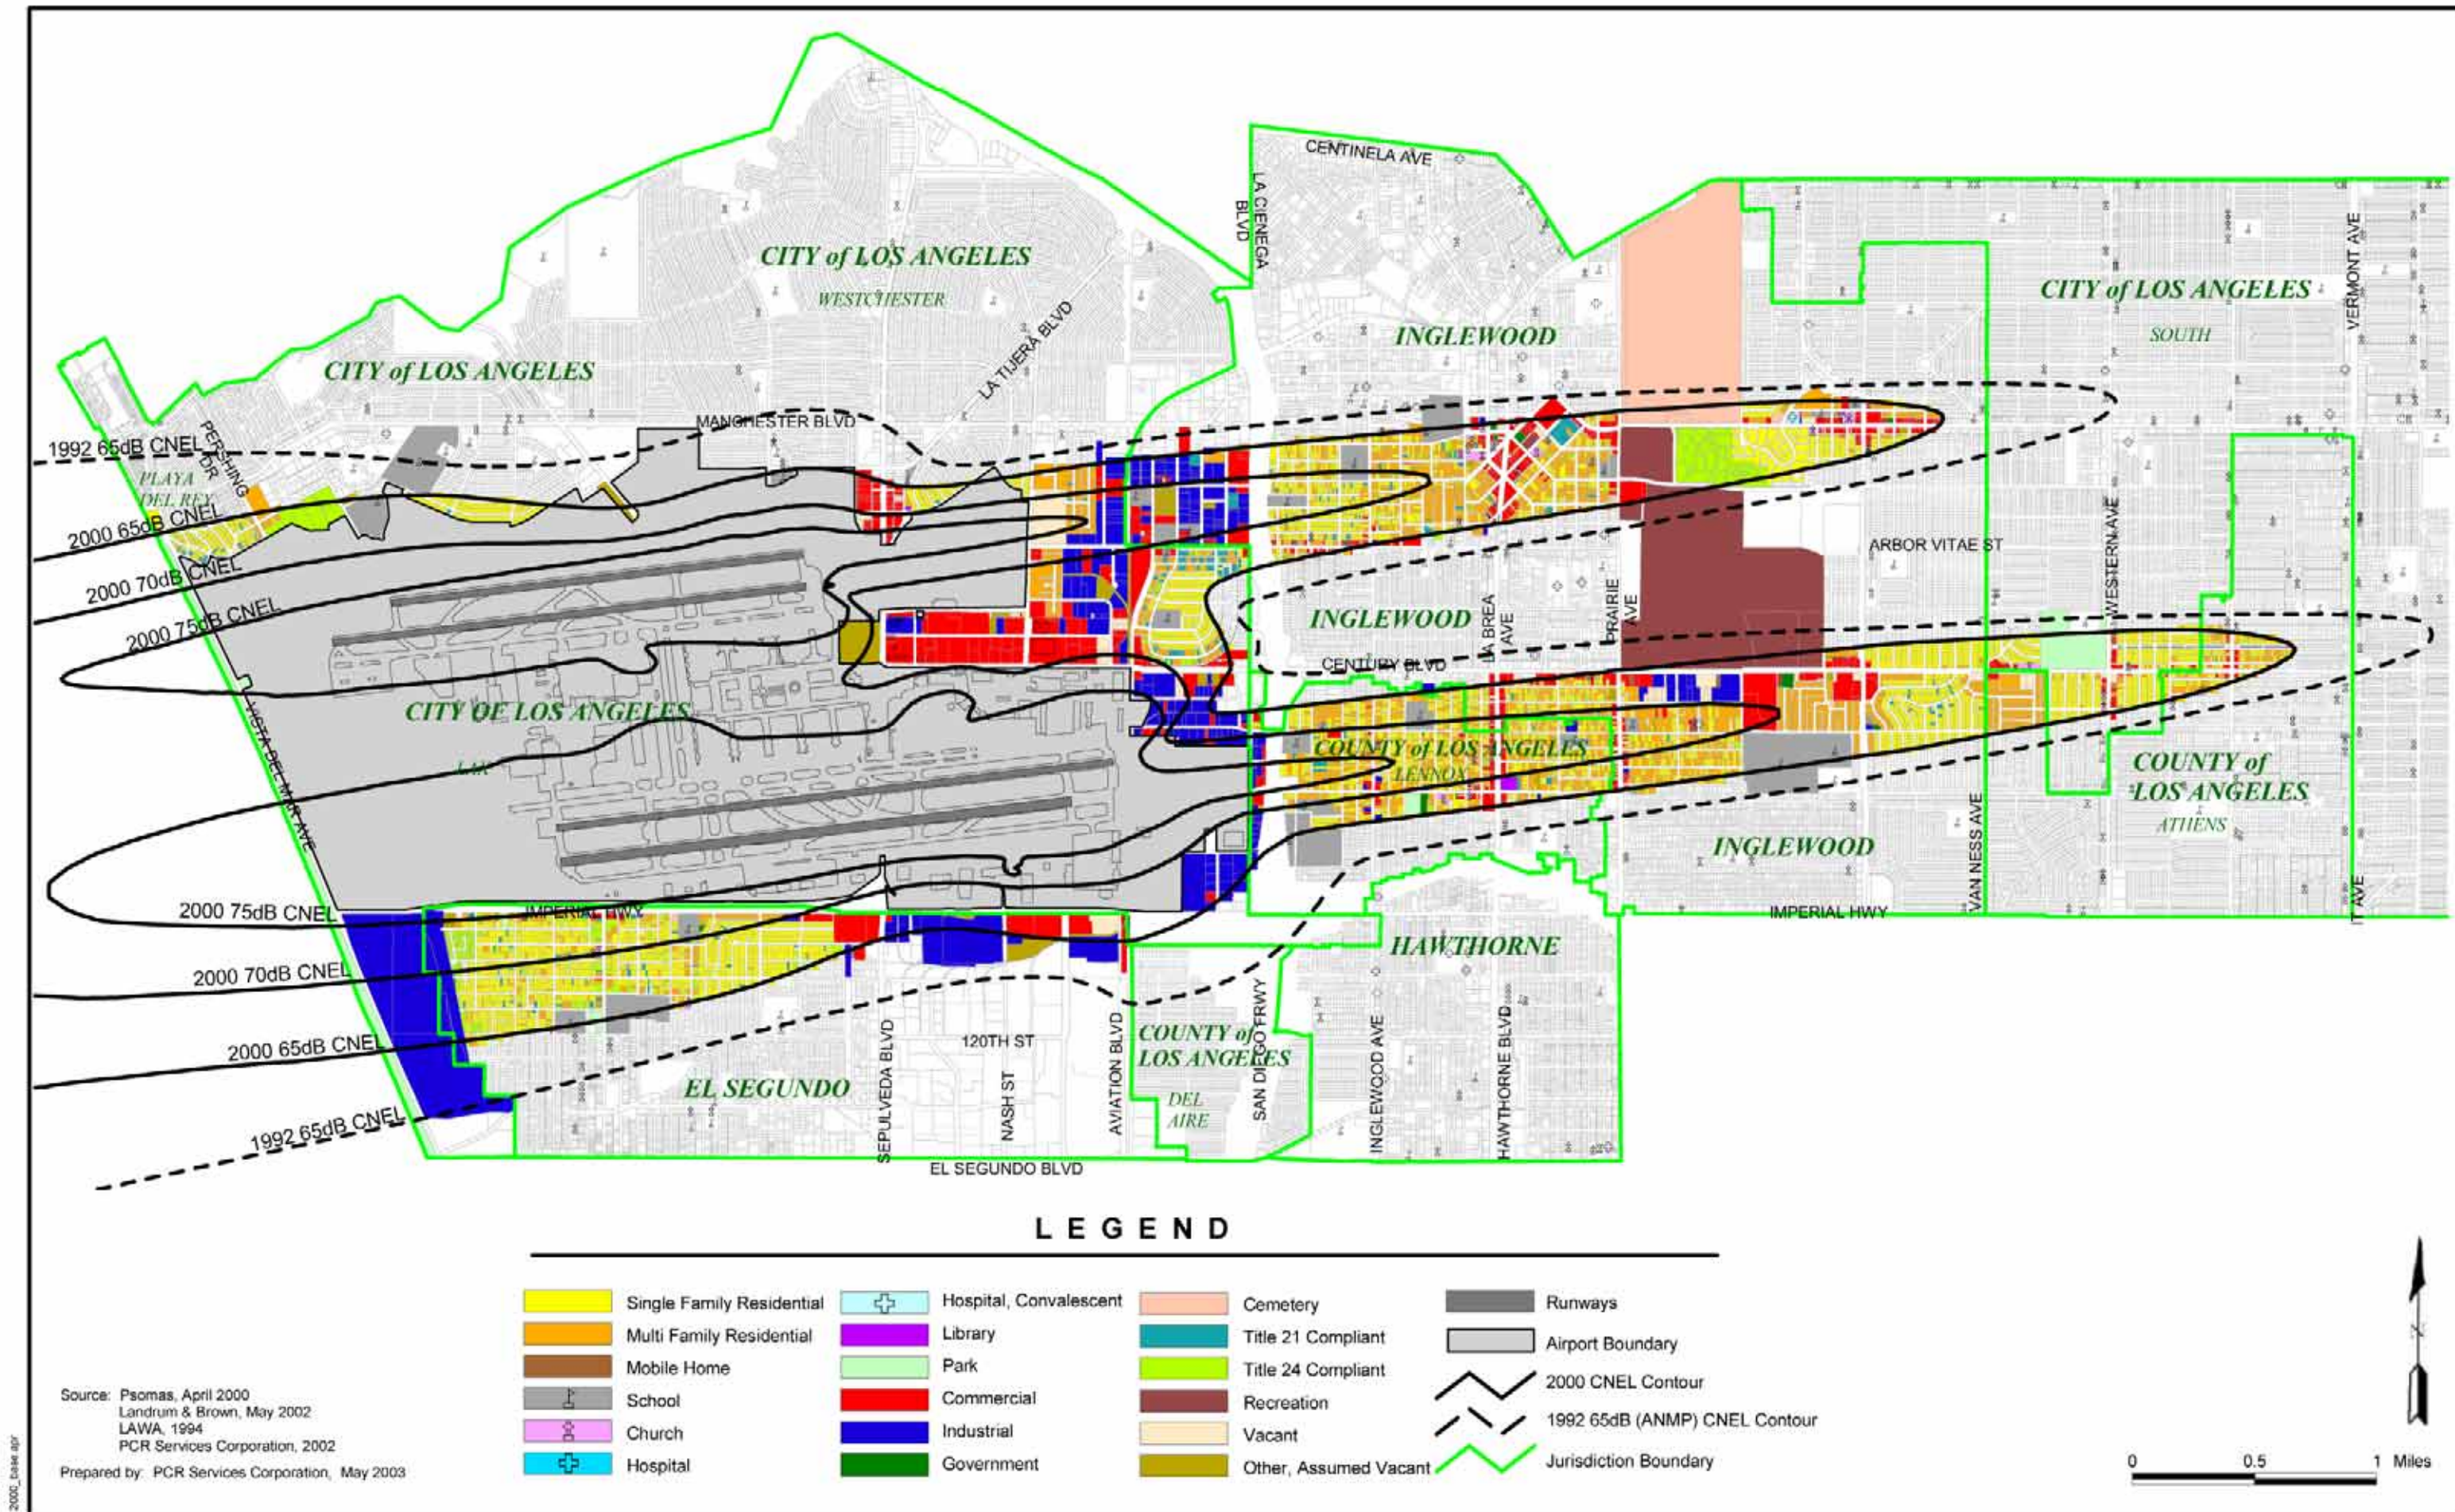

S-1. Supplemental Land Use Technical Report

jurisdiction and the annual performance of each jurisdiction in its efforts to achieve the mitigation of incompatible land uses. In the event that a jurisdiction is unable or unwilling to assist LAX in updating this information, LAX shall proceed using the best information available and shall document the use of estimated information in the update. LAX shall include this updated information with its second quarter "quarterly report" information that it sends to the County of Los Angeles pursuant to the reporting requirements within the state noise standards.

- ◆ LAX is requested to consider whether its policy of requiring aviation easements in exchange for funding of mitigation projects could be revised. LAX is encouraged to work with the City of El Segundo, and both parties are encouraged to work together, to develop policies that will help both achieve their respective public policy goals. LAX shall report to Caltrans its conclusions about the feasibility of revising Board of Airport Commissioners (BOAC) policy or its progress in achieving such revisions, if appropriate.
- ◆ LAX shall use its best efforts to request adjacent jurisdictions to require that all new construction of incompatible land uses within its largest forecast noise impact boundary be acoustically treated so that the interior CNEL will not exceed 45 decibels. LAX shall also request an aviation easement for aircraft noise for such new construction since acoustical treatment alone does not make new projects a compatible land use as defined by state noise standards.
- ◆ LAX is requested to continue in full force and effect, and to implement and enforce the following existing noise abatement policies to the extent of its authority: a) No turns before the shoreline; b) Over-ocean operations between 000 and 0630, weather permitting; c) Helicopter noise mitigation policies; d) preferential runway use policies; e) southwest buffer zone policies; and f) maintenance run-up of curfew between 2300 and 0600.
- ◆ LAX is requested to decide whether its noise regulations need to be revised as follows: a) Define vague and ambiguous terms as necessary; b) Incorporate therein the Airport Noise Complaint response Office in the "Reporting and Implementation Responsibilities" subsection, removing Community Relations therefrom; c) Replace archaic or little-used noise metrics with more common dB(A) equivalents in engine test cell specifications contained in the "Maintenance Restrictions" subsection; and d) Clarify Imperial Terminal policies as related to the definition and use of turbine-based ground power units and the Southwest Buffer zone.
- ◆ Within 45 days after the end of each calendar quarter year, LAX shall provide the information to the County of Los Angeles that it needs to prepare its quarterly Reports of Noise Monitoring. LAX shall include a brief report regarding the implementation of each of the conditions to this variance decision with the noise monitoring information forwarded each quarter. With its second calendar quarter information, LAX shall additionally include the information as described above.
- ◆ According to Section I.22 of the Caltrans decision, "The conflicting policies of the City of El Segundo and the BOAC appear to present a barrier to full implementation of the existing mitigation programs that are intended to reduce LAX's noise impact area to zero using methods that are considered to be the least burdensome or offensive to affected homeowners."

2.3.2 Year 2000 CNEL

A comparison of Year 2000 noise levels against the ANMP are presented in **Figure S1**, Year 2000 Conditions with ANMP. Year 2000 65 CNEL conditions are presented for comparison against the ANMP and future noise levels resulting from the LAX Master Plan build and No Action/No Project alternatives. As shown on **Figure S1**, the Year 2000 65 CNEL (and greater) contours are completely within the 1992 fourth quarter ANMP 65 CNEL contour. As a result, all residential and noise-sensitive uses exposed to 65 CNEL noise levels are considered to be potentially incompatible and may qualify for mitigation under the ANMP.

S-1. Supplemental Land Use Technical Report

Table S2, Year 2000 Conditions CNEL Noise Contours Total Area Within Each Jurisdiction, presents the acreage of surrounding jurisdictions exposed to noise levels of 65 CNEL or greater. Residential and noise-sensitive uses exposed to noise levels of 65 CNEL or greater are further quantified in **Table S3**, Year 2000 Conditions CNEL Noise Contours Incompatible Residential and Noise-Sensitive Properties by Jurisdiction (Exposed to 65 dB CNEL or Greater Noise Levels). **Table S4**, Year 2000 Conditions Incompatible Noise-Sensitive Uses (Exposed to 65 dB CNEL or Greater Noise Levels), identifies non-residential noise-sensitive parcels by name and location. In addition, some residential and noise-sensitive parcels would be newly exposed to the 65 CNEL noise contour, as shown in **Table S5**, Year 2000 Conditions Residential and Noise-Sensitive Uses Newly Exposed (Compared to 1996 Baseline Conditions).

Table S2

**Year 2000 Conditions CNEL Noise Contours
Total Area Within Each Jurisdiction**

	65-70 dB Acres	70-75 dB Acres	>75 dB Acres	Total ¹
LA City ²	1,236.19 (409.54)	1,179.67 (1134.33)	2,040.78 (2035.19)	4,456.63 (3579.06)

2.3.3 Single Event Noise Levels

2.3.3.1 Nighttime Awakenings

As presented in **Table S6**, 1996 Baseline 94 dBA SEL Noise Contour Total Area and Incompatible Residential Properties by Jurisdiction, under 1996 baseline conditions, some residential uses are exposed to single event noise levels that result in the awakening of 10 percent of the residents at least once every 10 days, as represented by the 94 dBA SEL noise contour. As shown in **Table S7**, Year 2000 Conditions 94 dBA SEL Noise Contour Total Area and Incompatible Residential Properties by Jurisdiction, under Year 2000 conditions, some residential uses are also exposed to 94 dBA SEL noise levels. Under Year 2000 conditions some residential uses would be newly exposed to 94 dBA SEL noise levels, as presented in **Table S8**, Year 2000 Conditions 94 dBA SEL Noise Contour Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL).

3. ENVIRONMENTAL CONSEQUENCES

3.1 No Action/No Project Alternative

3.1.1 Consistency with Land Use Plans

3.1.1.1 SCAG Regional Transportation Plan/Regional Aviation Plan

The No Action/No Project Alternative would be consistent with the policy framework of the Regional Aviation Plan, which calls for no expansion of LAX.

The RTP identifies a projected shortfall in passenger and air cargo capacity throughout the region and insufficient roadway capacity to accommodate airport-related traffic. Under the No Action/No Project Alternative the projected cargo capacity would be consistent with the cargo forecast for LAX; however, cargo capacity would not be distributed regionally. Limited expansion of commercial airport capacity would occur through refinements in scheduling, minor airfield improvements, and a higher proportion of larger aircraft. However, without the improvement of ground access, the airport and vicinity would experience greater traffic delays. Ground access improvements, including development of the LAX Expressway, extension of the MTA Green Line to the airport, and construction of an airport ring road, that are proposed under Alternatives A through C, and extension of the MTA Green Line under Alternative D, would not occur under this alternative.

SCAG is currently preparing the 2004 RTP, which will include updates to passenger, and cargo forecasts to account for the 30 MAP previously planned for the Orange County International Airport (formerly Marine Corps Air Station El Toro).

3.1.1.2 Los Angeles County Airport Land Use Plan

Consistency of the No Action/No Project Alternative with the Los Angeles County Airport Land Use Plan is the same as described in Section 4.2, *Land Use* (subsection 4.2.6.1), of the Draft EIS/EIR. As no changes in runways or other improvements are proposed, this alternative would not require an amendment to the ALUP and would not present safety issues that would conflict with safety policies in the ALUP. These policies are discussed in Section 4.24.3, *Safety*, of the Draft EIS/EIR.

Although no amendment to the ALUP is required under this alternative, a revised Los Angeles County Comprehensive Land Use Plan (CLUP) is currently being prepared consistent with the recommendations in the Caltrans Handbook, which will include policies applicable to all Los Angeles County Airports and will specifically address LAX.

3.1.1.3 Inglewood Housing Element

An increase in existing noise levels in residential or other noise sensitive areas would conflict with Objective 7 of the Housing Element to reduce community noise levels and incompatible uses. This inconsistency would be addressed through LAWA's ANMP and current MOU between LAWA and Inglewood, although some noise sensitive areas would continue to be exposed to high noise levels. Some residential areas within existing and future 65 CNEL and 94 dBA SEL noise contours are within redevelopment areas. Within these redevelopment areas, incompatible residential uses would be removed and these areas will be redeveloped to more compatible uses (either industrial or commercial).

3.1.2 Noise

3.1.2.1 Newly Exposed Areas

The noise contours that depict newly exposed areas and other changes from Year 2000 conditions to the No Action/No Project Alternative in 2015 are shown on **Figure S2**, No Action/No Project Alternative 2015 vs. Year 2000 Conditions Areas Newly Exposed. Residential and other noise sensitive parcels newly exposed to 65 CNEL noise levels in 2015 compared to Year 2000 conditions are presented in **Table S10**, No Action/No Project Alternative 2015 Newly Exposed Residential and Noise Sensitive Uses (Compared to Year 2000 Conditions). A listing of these uses is provided in **Table S11**, No Action/No Project

S-1. Supplemental Land Use Technical Report

Alternative 2015 Listing of Adversely Impacted Noise Sensitive Uses (Compared to Year 2000 Conditions). In addition, Dockweiler Beach State Park would be newly exposed to noise levels of 75 CNEL or greater, as shown in **Table S12**, No Action/No Project Alternative 2015 Listing of Parks Newly Exposed to 75 CNEL (Compared to Year 2000 Conditions).

Although portions of Dockweiler Beach State Park would be newly exposed to noise levels of 75 CNEL or greater, overall exposure to high noise levels would be reduced compared to Year 2000 conditions. Any increase in noise levels at portions of Dockweiler Beach State Park would not substantially interfere with the normal use of this park, which has functioned over time while exposed to high noise levels.

3.1.2.3 Nighttime Awakenings

As shown on **Figure S3**, No Action/No Project Alternative 2015 94 dBA SEL vs. 2000 94 dBA SEL Areas Newly Exposed, some residential parcels would be exposed to single event noise levels of 94 dBA SEL under this alternative. As presented in **Table S15**, No Action/No Project Alternative 2015 94 dBA SEL Noise Contour Total Area and Incompatible Residential Properties by Jurisdiction, under the No Action/No Project Alternative, some residential uses would be within the 94 dBA SEL noise contour.

Under the No Action/No Project Alternative, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions as listed in **Table S16**, No Action/No Project Alternative 2015 94 dBA SEL Noise Contour Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL).

Figure S3 shows the No Action/No Project Alternative 94 dBA SEL noise contour compared to the Year 2000 94 dBA SEL noise contour. Newly exposed residential parcels and population compared to 2000 94 dBA SEL are presented in **Table S17**, No Action/No Project Alternative 2015 94 dBA SEL Noise Contour Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL).

3.2 Alternative A

3.2.1 Westchester Business District

Acquisition of Community Commercial land use designations in the Westchester-Playa del Rey Community Plan and, more specifically, within portions of the Westchester Business District would occur under Alternatives A, B, and C, as presented in **Table S18**, Acquisition Within Westchester Business District (Acreage Comparison). The number and types of businesses that would be acquired under Alternative A are summarized on **Table S19**, Westchester Business District Alternative A.

S-1. Supplemental Land Use Technical Report

Table S18

**Acquisition Within Westchester Business District
(Acreage Comparison)**

	Alternative A	Alternative B	Alternative C	Alternative D ¹
Westchester-Playa del Rey Community Commercial Land Use Designation	150	150	150	150
Westchester Business District	51.08	51.08	51.08	51.08
Acquisition Area ² (% of WBD)	16.03 (31%)	10.95 (21%)	13.35 (26%)	N/A
Westchester Businesses Acquired	6.74	3.93	4.64	N/A
Remaining Westchester-Playa del Rey Community Commercial Land Use Designation After Acquisition (%)	133.97 (89%)	138.21 (92%)	136.44 (91%)	N/A
Remaining Westchester Business District After Acquisition (%)	35.05 (69%)	39.29 (77%)	37.52 (73%)	N/A

¹ Under Alternative D, no acquisition would occur within the Westchester Business District.

² Includes rental car, airport parking, public parking, and other miscellaneous uses.

² Unaccommodated retail space can be absorbed by the regional market.

Source: PCR, 2002.

3.2.2 Consistency with Land Use Plans

3.2.2.1 SCAG Regional Transportation Plan/Regional Aviation Plan

Alternative A would not be consistent with the policy framework of the Regional Aviation Plan, which calls for no expansion of LAX. This inconsistency could lead to traffic and air quality impacts that might not occur if demand was distributed more evenly among airports regionally.

However, this alternative would be consistent with other policies of the 2001 RTP by providing additional ground transportation improvements.

SCAG is currently preparing the 2004 RTP that will include updates to passenger and cargo forecasts to account for the 30 MAP previously planned for the Orange County International Airport (formerly Marine Corps Air Station El Toro).

3.2.2.2 Los Angeles County Airport Land Use Plan

Consistency of Alternative A with the ALUP is the same as described in Section 4.2, *Land Use* (subsection 4.2.6.2) of the Draft EIS/EIR. The improvements to the airport being proposed under Alternative A, including addition of the north runway and development of new uses within acquisition areas, would require changes to the airport planning boundary and existing RPZs as defined in the current ALUP for LAX. The CLUP for LAX is anticipated to be prepared subsequent to review and approval of the LAX Master Plan by the Airport Land Use Commission (ALUC). Therefore, the preparation of the CLUP would be contingent upon and consistent with LAX Master Plan that would eventually be adopted by the Board of Airport Commissioners (BOAC). In addition, the LAX Master Plan would incorporate recommendations of the BOAC and ALUC as part of the LAX Master Plan entitlement process.

With implementation of mitigation measures MM-N-4, Update the Aircraft Noise Abatement Program Elements as Applicable to Adapt to the Future Airfield Configuration (Alternatives A, B, C, and D); MM-N-5, Conduct Part 161 Study to Make Over Ocean Procedures Mandatory (Alternatives A, B, C, and D); MM-LU-1, Implement Revised Aircraft Noise Mitigation Program (Alternatives A, B, C, and D); MM-LU-2, Incorporate Residential Dwelling Units Exposed to Single Event Awakenings Threshold into Aircraft Noise Mitigation Program (Alternatives A, B, C, and D); MM-LU-3, Conduct Study of the Relationship Between Aircraft Noise Levels and the Ability of Children to Learn (Alternatives A, B, C, and D); MM-LU-4, Provide Additional Sound Insulation for Schools Shown by MM-LU-3 to be Significantly Impacted by Aircraft Noise (Alternatives A, B, C, and D); and MM-LU-5, Upgrade and Expand Noise Monitoring Program (Alternatives A, B, C, and D); the proposed Master Plan would not conflict with the general and noise related policies contained in the ALUP. As further described in Section 4.2, *Land Use* (subsection 4.2.8) of the Supplement to the Draft EIS/EIR, and in compliance with ALUP policy, LAWA would continue to adhere to the guidelines of the California Airport Noise Standards and take steps to accelerate the ANMP to achieve full compatibility of all eligible land uses affected by high levels of aircraft noise.

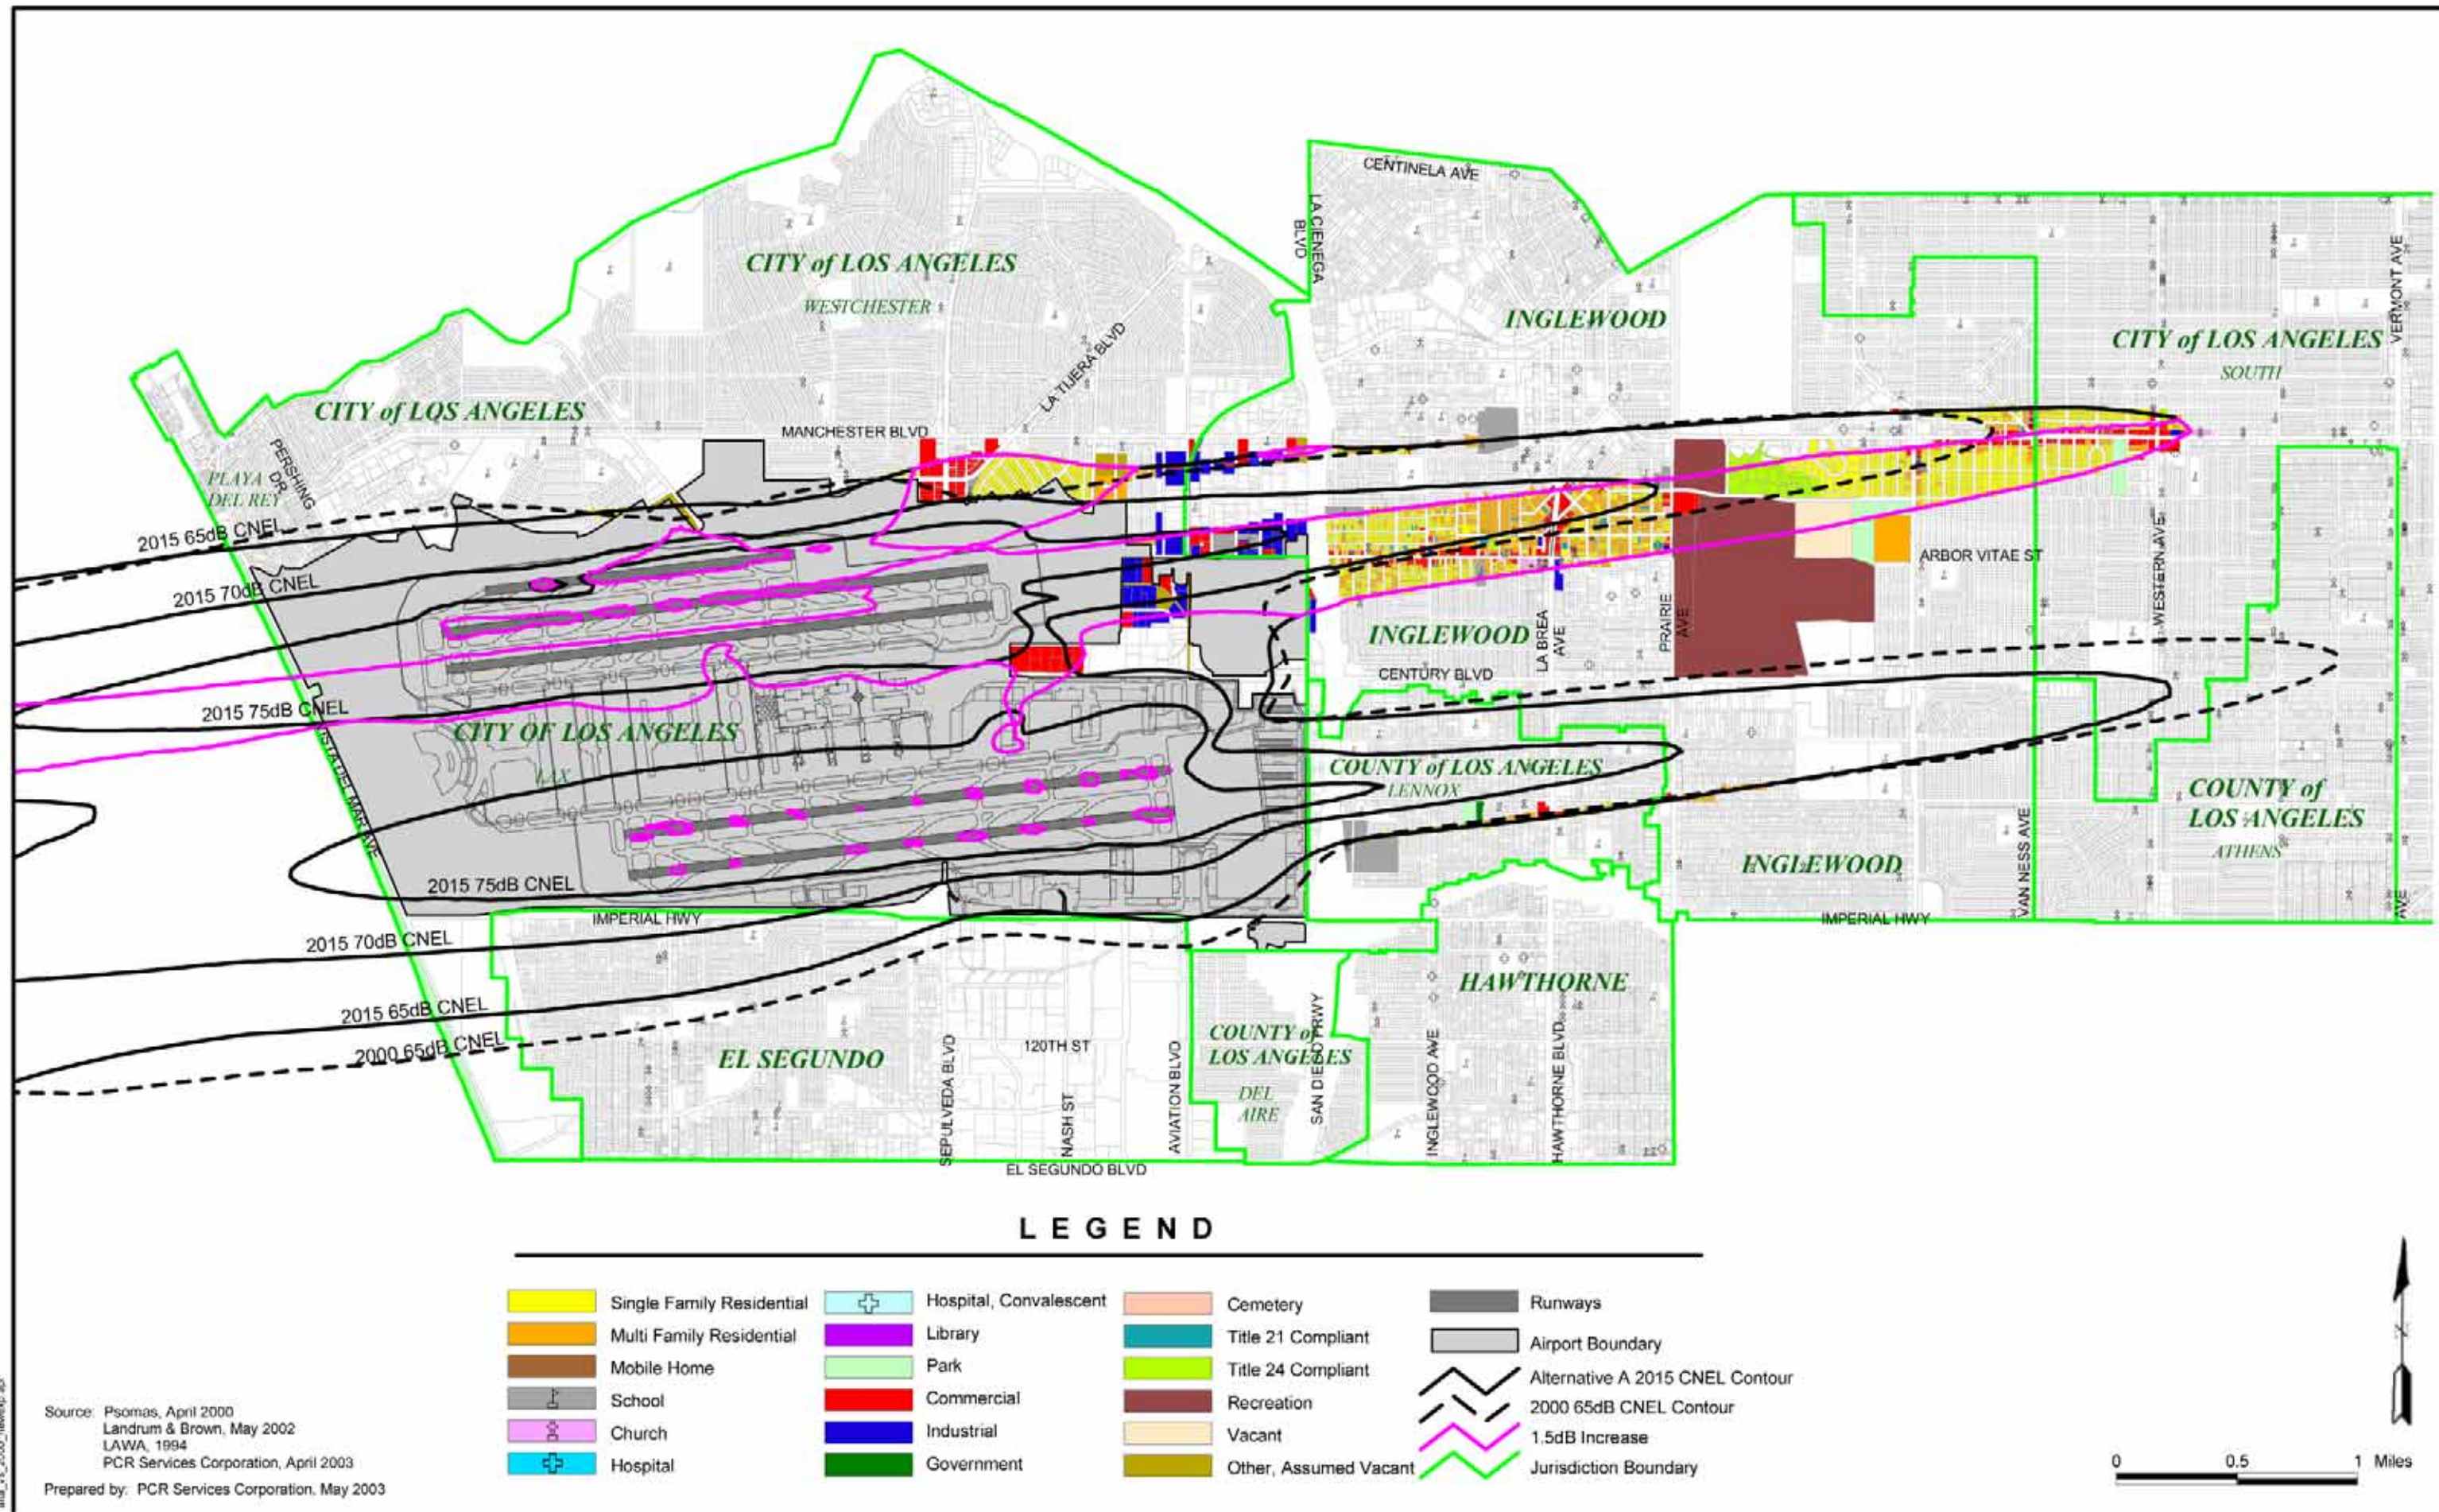

3.2.2.3 Inglewood Housing Element

Alternative A would be inconsistent with Objective 7 of the Housing Element to reduce community noise impacts, since there would be an increase of incompatible land uses compared to 1996 baseline conditions and the No Action/No Project Alternative. (Although compared to Year 2000 conditions, the area within the 65 CNEL would decrease under Alternative A.) In addition, some residential and noise-sensitive parcels would be newly exposed to 65 CNEL noise contours or experience a 1.5 CNEL increase within the 65 CNEL contours compared to the 1996 baseline and Year 2000 conditions and the No Action/No Project Alternative. Some residential parcels would also be newly exposed to significantly high single event noise levels within the 94 dBA SEL contour. Since a physical effect on these uses would result, this plan inconsistency would be considered to be significant. However, under the City of Inglewood's Redevelopment Plan, some residential parcels located within areas newly exposed to high noise levels would be acquired and redeveloped with a more compatible use.

3.2.3 Noise

3.2.3.1 Newly Exposed Areas

The noise contours that depict newly exposed areas and other changes from Year 2000 conditions to the Alternative A in 2015 are shown on **Figure S4**, Alternative A 2015 vs. Year 2000 Conditions Areas Newly Exposed. Residential and other noise sensitive parcels newly exposed to 65 CNEL noise levels in 2015 compared to Year 2000 conditions are presented in **Table S20**, Alternative A 2015 Newly Exposed Residential and Noise-Sensitive Uses (Compared to Year 2000 Conditions). A listing of these uses is provided in **Table S21**, Alternative A 2015 Listing of Significantly Impacted Noise Sensitive Uses (Compared to Year 2000 Conditions). In addition, a school, park, and some residential uses would be newly exposed to noise levels of 75 CNEL or greater, as shown in **Table S22**, Alternative A 2015 Listing of Schools and Parks Newly Exposed to 75 CNEL (Compared to Year 2000 Conditions) and **Table S23**, Alternative A 2015 Total Residential Acres Newly Exposed to 75 CNEL (Compared to Year 2000 Conditions).

3.2.3.2 Increases in 1.5 CNEL

A summary of acres within jurisdictions exposed to 1.5 CNEL increases in the 65, 70, 75 CNEL Noise Contours is presented in **Table S24**, Alternative A 2015 1.5 CNEL Increase Compared to Year 2000 Conditions (Total Area Within Each Jurisdiction). The number of residential units, population, and noise-sensitive uses experiencing a significant noise increase within the 65 CNEL (or greater) contour is presented in **Table S25**, Alternative A 1.5 CNEL Increase Compared to Year 2000 Conditions. A summary of noise-sensitive receptors that experience a 1.5 dB increase within the 65 dB CNEL noise contours as a result of Alternative A is presented in **Table S21**.

¹ Indicates newly exposed to 65 dB CNEL noise contour.

² Indicates increased noise level of 1.5 dB within 65 dB CNEL or greater noise contour.

Note: Noise levels of parks are considered potentially significant and are further evaluated for significant impacts based on criteria used in Department of Transportation Act, Section 4(f) [Recodified at 49 USC Section 303] as presented in the Draft EIS/EIR, Appendix H.

3.2.3.3 Nighttime Awakenings

As shown on **Figure S5**, Alternative A 2015 94 dBA SEL vs. 2000 94 dBA SEL Areas Newly Exposed, some residential parcels would be exposed to single event noise levels of 94 dBA SEL under this alternative. As presented in **Table S26**, Alternative A 2015 94 dBA SEL Noise Contour Total Area and Incompatible Residential Properties by Jurisdiction, under Alternative A, some residential uses would be within the 94 dBA SEL noise contour.

Under Alternative A, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions as listed in **Table S27**, Alternative A 2015 94 dBA SEL Noise Contour Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL).

Figure S5 shows Alternative A 94 dBA SEL noise contour compared to the Year 2000 94 dBA SEL noise contour. Newly exposed residential parcels and population compared to 2000 94 dBA SEL are presented in **Table S28**, Alternative A 2015 94 dBA SEL Noise Contours Residential Uses Newly Exposed (Compared to 2000 SEL).

3.3.2 Consistency with Land Use Plans

3.3.2.1 SCAG Regional Transportation Plan/Regional Aviation Plan

Similar to Alternative A, Alternative B would not be consistent with the policy framework of the Regional Aviation Plan, which calls for no expansion of LAX. This inconsistency could lead to traffic and air quality impacts that might not occur if demand was distributed more evenly among airports regionally. However, Alternative B would be consistent with other policies of the 2001 RTP by providing additional ground transportation improvements.

SCAG is currently preparing the 2004 RTP that will include updates to passenger and cargo forecasts to account for the 30 MAP previously planned for the Orange County International Airport (formerly Marine Corps Air Station El Toro).

3.3.2.2 Los Angeles County Airport Land Use Plan

Consistency of Alternative B with the ALUP is the same as described in Section 4.2, *Land Use* (subsection 4.2.6.3), of the Draft EIS/EIR. Similar to Alternative A, the improvements to the airport being proposed under Alternative B would require changes to the airport planning boundary and existing RPZs as defined in the current ALUP for LAX. The CLUP for LAX is anticipated to be prepared subsequent to review and approval of the LAX Master Plan by the Airport Land Use Commission (ALUC). Therefore, the preparation of the CLUP would be contingent upon and consistent with LAX Master Plan that would eventually be adopted by the Board of Airport Commissioners (BOAC). In addition, the LAX Master Plan would incorporate recommendations of the BOAC and ALUC as part of the LAX Master Plan entitlement process.

With implementation of mitigation measures MM-N-4, Update the Aircraft Noise Abatement Program Elements as Applicable to Adapt to the Future Airfield Configuration (Alternatives A, B, C, and D); MM-N-5, Conduct Part 161 Study to Make Over-Ocean Procedures Mandatory (Alternatives A, B, C, and D); MM-LU-1, Implement Revised Aircraft Noise Mitigation Program (Alternatives A, B, C, and D); MM-LU-2, Incorporate Residential Dwelling Units Exposed to Single Event Awakenings Threshold into Aircraft Noise Mitigation Program (Alternatives A, B, C, and D); MM-LU-3, Conduct Study of the Relationship Between Aircraft Noise Levels and the Ability of Children to Learn (Alternatives A, B, C, and D); MM-LU-4, Provide Additional Sound Insulation for Schools Shown by MM-LU-3 to be Significantly Impacted by Aircraft Noise (Alternatives A, B, C, and D); and MM-LU-5, Upgrade and Expand Noise Monitoring Program (Alternatives A, B, C, and D); the proposed Master Plan would not conflict with the general and noise related policies contained in the ALUP. As further described in Section 4.2, *Land Use*, (subsection 4.2.8), in the Supplement to the Draft EIS/EIR, and in compliance with ALUP policy, LAWA would continue to adhere to the guidelines of the California Airport Noise Standards, and would take steps to accelerate the ANMP to achieve full compatibility of all eligible land uses affected by high levels of aircraft noise.

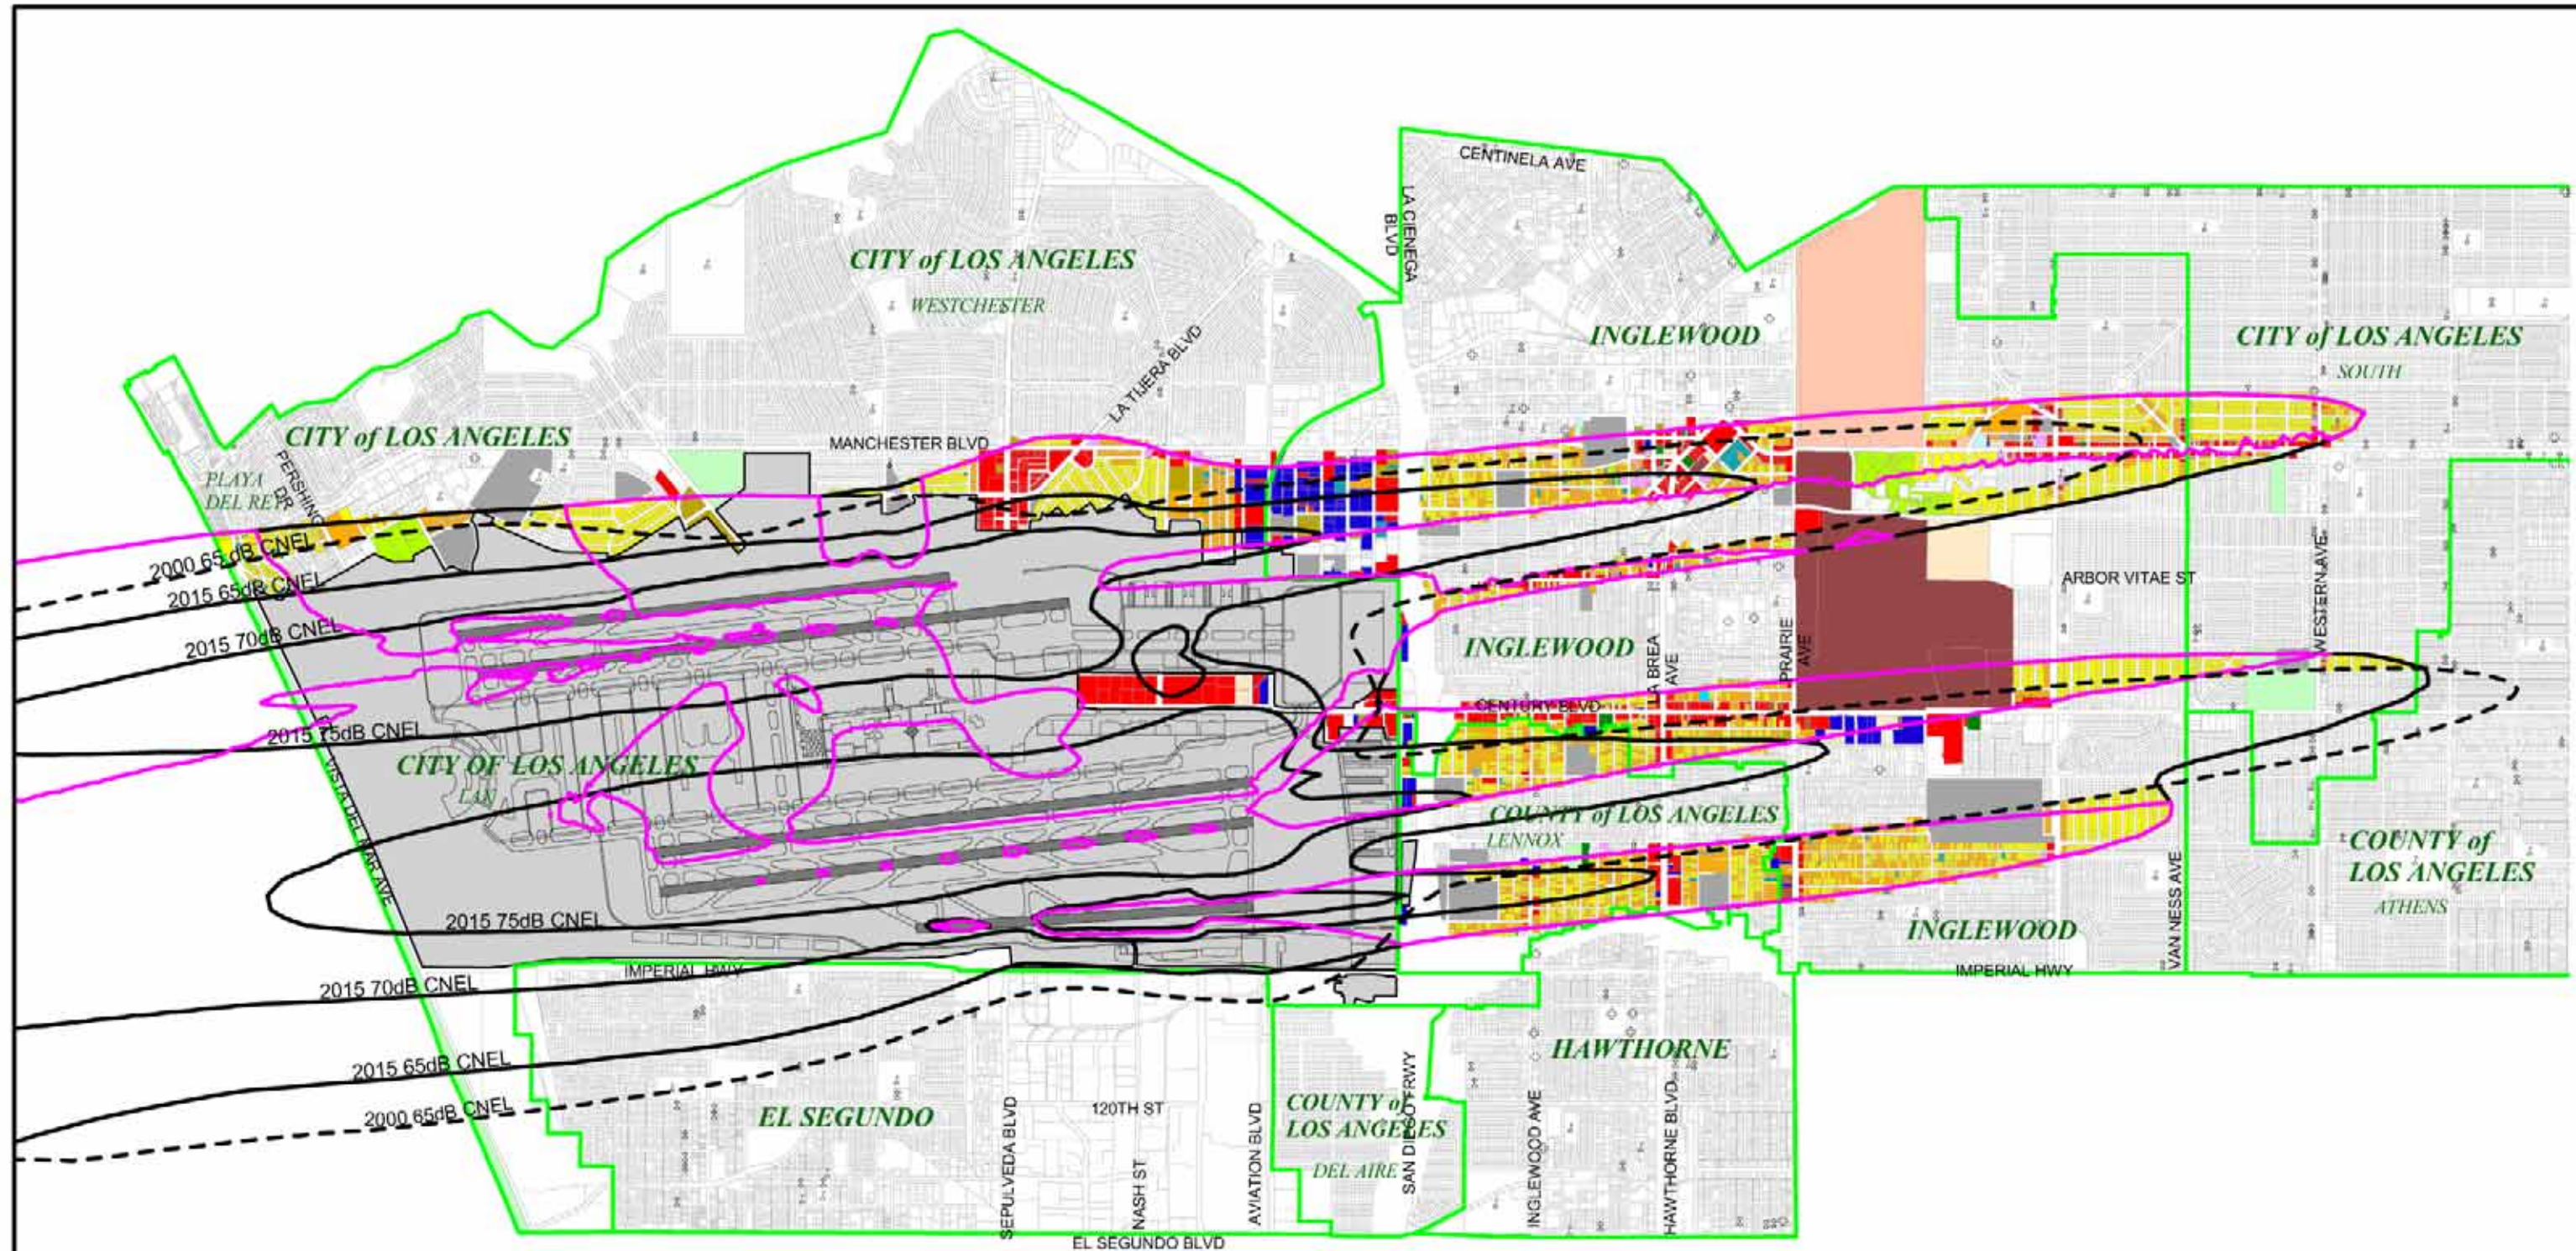

3.3.2.3 Inglewood Housing Element

Similar to Alternative A, Alternative B would be inconsistent with Objective 7 of the Housing Element to reduce community noise impacts, since there would be an increase of incompatible land uses compared to the 1996 baseline, Year 2000 conditions, and the No Action/No Project Alternative. In addition, some residential and noise-sensitive parcels would be newly exposed to 65 CNEL noise contours or experience a 1.5 CNEL increase within the 65 CNEL contours compared to the 1996 baseline, Year 2000 conditions, and the No Action/No Project Alternative. Some residential parcels would also be newly exposed to significant high single event noise levels within the SEL contour. Since a physical effect on these uses would result, this plan inconsistency would be considered to be significant. However, like Alternative A, under the City of Inglewood's Redevelopment Plan, some residential parcels located within areas newly exposed to high noise levels under Alternative B would be acquired and redeveloped with a more compatible use.

3.3.3 Noise

3.3.3.1 Newly Exposed Areas

The noise contours that depict newly exposed areas and other changes from Year 2000 conditions to Alternative B in 2015 are shown on **Figure S6**, Alternative B 2015 vs. Year 2000 Conditions Areas Newly Exposed. Residential and other noise sensitive parcels newly exposed to 65 CNEL noise levels in 2015 compared to Year 2000 conditions are presented in **Table S30**, Alternative B 2015 Newly Exposed Residential and Noise-Sensitive Uses (Compared to Year 2000 Conditions). A listing of these uses is provided in **Table S31**, Alternative B 2015 Listing of Significantly Impacted Noise-Sensitive Uses (Compared to Year 2000 Conditions). In addition, 2 schools, one park, and some residential uses would be newly exposed to noise levels of 75 CNEL or greater, as shown in **Table S32**, Alternative B 2015 Listing of Schools and Parks Newly Exposed to 75 CNEL (Compared to Year 2000 Conditions) and **Table S33**, Alternative B 2015 Total Residential Acres Newly Exposed to 75 CNEL (Compared to Year 2000 Conditions).

3.3.3.2 Increases in 1.5 CNEL

A summary of acres within jurisdictions exposed to 1.5 CNEL increases in the 65, 70, 75 CNEL Noise Contours is presented in **Table S34**, Alternative B 2015 1.5 CNEL Increase Compared to Year 2000 Conditions (Total Area Within Each Jurisdiction). The number of residential units, population, and noise-sensitive uses experiencing a significant noise increase within the 65 CNEL (or greater) contour is presented in **Table S35**, Alternative B 1.5 CNEL Increase Compared to Year 2000 Conditions. A summary of noise-sensitive receptors that experience a 1.5 CNEL increase within the 65 CNEL noise contours as a result of Alternative B is presented in **Table S31**.

3.3.3.3 Nighttime Awakenings

As shown on **Figure S7**, Alternative B 2015 94 dBA SEL vs. 2000 94 dBA SEL Areas Newly Exposed, some residential parcels would be exposed to single event noise levels of 94 dBA SEL under this alternative. As presented in **Table S36**, Alternative B 2015 94 dBA SEL Noise Contour Total Area and Incompatible Residential Properties by Jurisdiction, under Alternative B, some residential uses would be within the 94 dBA SEL noise contour.

Under Alternative B, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions as listed in **Table S37**, Alternative B 2015 94 dBA SEL Noise Contour Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL).

Figure S7 shows Alternative B 94 dBA SEL noise contour compared to the Year 2000 94 dBA SEL noise contour. Newly exposed residential parcels and population under this alternative compared to 2000 94 dBA SEL are presented in **Table S38**, Alternative B 2015 94 dBA SEL Noise Contours Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL).

3.4 Alternative C

3.4.1 Westchester Business District

The number and types of businesses that would be acquired under Alternative C are summarized in **Table S39**, Westchester Business District Alternative C.

3.4.2 Consistency with Land Use Plans

3.4.2.1 SCAG Regional Transportation Plan/Regional Aviation Plan

Alternative C would not be consistent with the policy framework of the Regional Aviation Plan, which calls for no expansion of LAX. This inconsistency could lead to traffic and air quality impacts that might not occur if demand was distributed more evenly among airports regionally. However, this alternative would be consistent with other policies of the 2001 RTP by providing additional ground transportation improvements.

SCAG is currently preparing the 2004 RTP that will include updates to passenger and cargo forecasts to account for the 30 MAP previously planned for the Orange County International Airport (formerly Marine Corps Air Station El Toro).

3.4.2.2 Los Angeles County Airport Land Use Plan

Consistency of Alternative C with the ALUP is the same as described in Section 4.2, *Land Use* (subsection 4.2.6.4), of the Draft EIS/EIR. Similar to Alternative A, the improvements to the airport being proposed under Alternative C would require changes to the airport planning boundary and existing RPZs as defined in the current ALUP for LAX. The CLUP for LAX is anticipated to be prepared subsequent to review and approval of the LAX Master Plan by the Airport Land Use Commission (ALUC). Therefore, the preparation of the CLUP would be contingent upon and consistent with LAX Master Plan that would eventually be adopted by the Board of Airport Commissioners (BOAC). In addition, the LAX Master Plan would incorporate recommendations of the BOAC and ALUC as part of the LAX Master Plan entitlement process.

Source: PCR, 2002.

With implementation of mitigation measures MM-N-4, Update the Aircraft Noise Abatement Program Elements as Applicable to Adapt to the Future Airfield Configurations (Alternatives A, B, C, and D); MM-N-5, Conduct Part 161 Study to Make Over-Ocean Procedures Mandatory (Alternatives A, B, C, and D); MM-LU-1, Implement Revised Aircraft Noise Mitigation Program (Alternatives A, B, C, and D); MM-LU-2, Incorporate Residential Dwelling Units Exposed to Single Event Awakenings Threshold into Aircraft Noise Mitigation Program (Alternatives A, B, C, and D); MM-LU-3, Conduct Study of the Relationship Between Aircraft Noise Levels and the Ability of Children to Learn (Alternatives A, B, C, and D); MM-LU-4, Provide Additional Sound Insulation for Schools Shown by MM-LU-3 to be Significantly Impacted by Aircraft Noise (Alternatives A, B, C, and D); and MM-LU-5, Upgrade and Expand Noise Monitoring Program (Alternatives A, B, C and D); the proposed Master Plan would not conflict with the general and noise related policies contained in the ALUP. As further described in Section 4.2, *Land Use* (subsection 4.2.8) of the Supplement to the Draft EIS/EIR, and in compliance with ALUP policy, LAWA would continue to adhere to the guidelines of the California Airport Noise Standards, and would take steps to accelerate the ANMP to achieve full compatibility of all eligible land uses affected by high levels of aircraft noise.

3.4.2.3 Inglewood Housing Element

Similar to Alternative A, Alternative C would be inconsistent with goals of the Noise Element and Objective 7 of the Housing Element to reduce community noise impacts, since there would be an increase of incompatible land uses compared to 1996 baseline conditions and the No Action/No Project Alternative. (Although compared to Year 2000 conditions, the area within the 65 CNEL would decrease under Alternative C.) In addition, some residential and noise-sensitive parcels would be newly exposed to 65 CNEL noise contours or experience a 1.5 CNEL increase within the 65 CNEL contours compared to the 1996 baseline, Year 2000 conditions, and the No Action/No Project Alternative. Some residential parcels would also be newly exposed to significantly high single event noise levels within the 94 dBA SEL contour. Since a physical effect on these uses would result, this plan inconsistency would be considered to be significant. However, under the City of Inglewood's Redevelopment Plan, some residential parcels located within areas newly exposed to high noise levels would be acquired and redeveloped with a more compatible use.

3.4.3 Noise

3.4.3.1 Newly Exposed Areas

The noise contours that depict newly exposed areas and other changes from Year 2000 conditions to Alternative C in 2015 are shown on **Figure S8**, Alternative C 2015 vs. Year 2000 Conditions Areas Newly Exposed. Residential and other noise sensitive parcels newly exposed to 65 CNEL noise levels in 2015 compared to Year 2000 conditions are presented in **Table S40**, Alternative C 2015 Newly Exposed Residential and Noise-Sensitive Uses (Compared to Year 2000 Conditions). A listing of these uses is provided in **Table S41**, Alternative C 2015 Listing of Significantly Impacted Noise-Sensitive Uses (Compared to Year 2000 Conditions). In addition, one park would be newly exposed to noise levels of 75 CNEL or greater, as shown in **Table S42**, Alternative C 2015 Listing of Parks Newly Exposed to 75 CNEL (Compared to Year 2000 Conditions).

3.4.3.3 Nighttime Awakenings

As shown on **Figure S9**, Alternative C 2015 94 dBA SEL vs. 2000 94 dBA SEL Areas Newly Exposed, some residential parcels would be exposed to periodic noise levels of 94 dBA SEL under this alternative. As presented in **Table S45**, Alternative C 2015 94 dBA SEL Noise Contour Total Area and Incompatible Residential Properties by Jurisdiction, under Alternative C, some residential uses would be within the 94 dBA SEL noise contour.

Under Alternative C, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions as listed in **Table S46**, Alternative C 2015 94 dBA SEL Noise Contour Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL).

Figure S9 shows Alternative C 94 dBA SEL noise contour compared to the Year 2000 94 dBA SEL noise contour. Newly exposed residential parcels and population under this alternative compared to 2000 94 dBA SEL are presented in **Table S47**, Alternative C 2015 94 dBA SEL Noise Contours Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL).

3.5 Alternative D

3.5.1 Westchester Business District

Acquisition within the Westchester Business District would not occur under Alternative D, as shown in Table S18.

3.5.2 Consistency with Land Use Plans

Since consistency of Alternative D with regional and local plans was not previously analyzed for this new alternative, a complete discussion is provided in Section 4.2, *Land Use* (subsection 4.2.6.5), of the Supplement to the Draft EIS/EIR.

3.5.3 Noise

Table S48, Alternative D CNEL Noise Contours Total Area within Each Jurisdiction, presents an overview of the number of acres within each jurisdiction that would be exposed to 65, 70, and 75 CNEL Noise Contours. Residential and noise-sensitive receptors that fall within 65, 70, and 75 CNEL noise contours are presented in **Table S49**, Alternative D CNEL Noise Contours Incompatible Residential and Noise-Sensitive Properties by Jurisdiction.

3.5.3.1 Newly Exposed Areas

Residential and other noise sensitive parcels newly exposed to 65 CNEL noise levels in 2015 compared to Baseline 1996 conditions are presented in **Table S50**, Alternative D 2015 Newly Exposed Residential and Noise-Sensitive Uses (Compared to 1996 Baseline Conditions). A listing of these uses is provided in **Table S51**, Alternative D 2015 Listing of Significantly Impacted Noise-Sensitive Uses (Compared to 1996 Baseline Conditions).

The noise contours that depict newly exposed areas and other changes from Year 2000 conditions to Alternative D in 2015 are shown on **Figure S10**, Alternative D 2015 vs. Year 2000 Conditions Areas Newly Exposed. Residential and other noise sensitive parcels newly exposed to 65 CNEL noise levels in 2015 compared to Year 2000 conditions are presented **Table S52**, Alternative D 2015 Residential and

Noise-Sensitive Uses Newly Exposed (Compared to Year 2000 Conditions). A listing of these uses is provided in **Table S53**, Alternative D 2015 Listing of Significantly Impacted Noise-Sensitive Uses (Compared to Year 2000 Conditions). In addition, one park would be newly exposed to noise levels of 75 CNEL or greater, as shown in **Table S54**, Alternative D 2015 Listing of Parks Newly Exposed to 75 CNEL (Compared to Year 2000 Conditions).

Residential and other noise sensitive parcels newly exposed to 65 CNEL noise levels in 2015 compared to the No Action/No Project Alternative are presented in **Table S55**, Alternative D 2015 Residential and Noise-Sensitive Uses Newly Exposed (Compared to No Action/No Project Alternative). A listing of these uses is provided in **Table S56**, Alternative D 2015 Listing of Adversely Impacted Noise-Sensitive Uses (Compared to No Action/No Project Alternative).

¹ Indicates newly exposed to 65 dB CNEL noise contour.

² Indicates increased noise level of 1.5 dB within 65 dB CNEL or greater noise contour.

³ This library closed on March 29, 2003, and would therefore not be impacted under Alternative D and is not counted in Table S60.

Note: Noise levels of parks are considered potentially significant and are further evaluated for significant impacts based on criteria used in Department of Transportation Act, Section 4(f) [Recodified at 49 USC Section 303] as described in Section 4.8, *Department of Transportation Act, Section 4(f)* (subsection 4.8.6.3), of the Supplement to the Draft EIS/EIR.

3.5.3.2 Increases in 1.5 CNEL

A summary of acres within jurisdictions exposed to 1.5 CNEL increases in the 65, 70, 75 CNEL Noise Contours is presented in **Table S57**, Alternative D 2015 1.5 CNEL Increase Compared to 1996 Baseline Conditions (Total Area Within Each Jurisdiction). The number of residential units, population, and noise-sensitive uses experiencing a significant noise increase within the 65 CNEL (or greater) contour is presented in **Table S58**, Alternative D 2015 1.5 CNEL Increase Compared to 1996 Baseline Conditions. A summary of noise-sensitive receptors that experience a 1.5 CNEL increase within the 65 CNEL noise contours as a result of Alternative D is presented in **Table S51**.

For Year 2000 conditions, a summary of acres by jurisdiction exposed to 1.5 CNEL increases in the 65, 70, 75 CNEL Noise Contours is presented in **Table S59**, Alternative D 2015 1.5 CNEL Increase Compared to Year 2000 Conditions (Total Area Within Each Jurisdiction). The number of residential

3.5.1.3 Nighttime Awakenings

As shown on **Figure S11**, Alternative D 2015 94 dBA SEL vs. 2000 94 dBA SEL Areas Newly Exposed, some residential parcels would be exposed to single event noise levels of 94 dBA SEL under this alternative. As presented in **Table S63**, Alternative D 2015 94 dBA SEL Noise Contour Total Area and

S-1. Supplemental Land Use Technical Report

Incompatible Residential Properties by Jurisdiction, under Alternative D, some residential uses would be within the 94 dBA SEL noise contour.

Under Alternative D, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions as listed in **Table S64**, Alternative D 2015 94 dBA SEL Noise Contour Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL).

Figure S11 shows Alternative D 94 dBA SEL noise contour compared to the Year 2000 94 dBA SEL noise contour. Newly exposed residential parcels and population under this alternative compared to 2000 94 dBA SEL are presented in **Table S65**, Alternative D 2015 94 dBA SEL Noise Contours Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL).

4. LEVEL OF SIGNIFICANCE AFTER INCORPORATION OF MANDATORY OVER-OCEAN PROCEDURES (PART 161)

As stated in Appendix S-C1, *Supplemental Aircraft Noise Technical Report*, of the Supplement to the Draft EIS/EIR, even with the incorporation of mandatory over-ocean procedures some areas would be newly exposed to high single event aircraft noise levels resulting in nighttime awakenings compared to 1996 baseline and Year 2000 conditions. In addition, some of these newly exposed areas would be outside of the current ANMP boundaries. Areas that would be exposed to high single event aircraft noise levels (defined as within the 94 dBA SEL noise contour) are presented in tables and graphically shown for Alternatives A through D.

4.1 Alternative A

4.1.1 Overall Noise Exposure

Under Alternative A, some residential parcels in 2015 would be exposed to periodic noise levels of 94 dBA SEL even with the incorporation of mandatory over-ocean procedures as shown on **Figure S12**, Alternative A 2015 94 dBA SEL Part 161 Mitigation Contour vs. Unmitigated Alternative A 2015 94 dBA SEL and presented in **Table S66**, Alternative A 2015 94 dBA SEL Noise Contour Part 161 Mitigation Total Area and Incompatible Residential Properties by Jurisdiction. **Table S67**, Alternative A 2015 94 dBA SEL Noise Contour Part 161 Mitigation Compared to Unmitigated Alternative A 2015 94 dBA SEL, presents the number of units and population (using 1990 census data) that would be mitigated from single event high noise levels with the incorporation of mandatory over-ocean procedures compared to the Alternative A 2015 94 dBA SEL noise contour.

4.1.2 Newly Exposed Areas

Figure S13, Alternative A 2015 94 dBA SEL Part 161 Mitigation Contour vs. 1996 94 dBA SEL Areas Newly Exposed, shows Alternative A 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to the 1996 Alternative A 2015 94 dBA SEL Part 161 Mitigation Contour vs. Unmitigated Alternative A 2015 94 dBA SEL noise contour. As shown on **Figure S13** and presented in **Table S68**, Alternative A 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of Alternative A 2015 94 dBA SEL Part 161 Mitigation Contour vs. Unmitigated Alternative A 2015 94 dBA SEL compared to 1996 baseline conditions.

Figure S14, Alternative A 2015 94 dBA SEL Part 161 Mitigation Contour vs. 2000 94 dBA SEL Areas Newly Exposed, shows Alternative A 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to 2000 94 dBA SEL noise contour. As shown on **Figure S14** and presented in **Table S69**, Alternative A 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to Year 2000 conditions.

In addition, some areas newly exposed to the 94 dBA SEL under Alternative A, with the inclusion of mandatory over-ocean procedures would be outside of the 1996 ANMP noise contours, as shown on **Figure S15**, Alternative A 2015 94 dBA SEL Part 161 Mitigation Contour vs. ANMP Areas Newly Exposed and listed in **Table S70**, Alternative A 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1992 65 CNEL Noise Contour).

4.2 Alternative B

4.2.1 Overall Noise Exposure

Under Alternative B, some residential parcels in 2015 would be exposed to single event noise levels of 94 dBA SEL even with the incorporation of mandatory over-ocean procedures as shown on **Figure S16**, Alternative B 2015 94 dBA SEL Part 161 Mitigation Contour vs. Unmitigated Alternative B 2015 94 dBA SEL and presented in **Table S71**, Alternative B 2015 94 dBA SEL Noise Contour Part 161 Mitigation Total Area and Incompatible Residential Properties by Jurisdiction. **Table S72**, Alternative B 2015 94 dBA SEL Noise Contour Part 161 Mitigation Compared to Unmitigated Alternative B 2015 94 dBA SEL, presents the number of units and population (using 1990 census data) that would be mitigated from single event high noise levels with the incorporation of mandatory over-ocean procedures compared to the Alternative B 2015 94 dBA SEL noise contour.

4.2.2 Newly Exposed Areas

Figure S17, Alternative B 2015 94 dBA SEL Part 161 Mitigation Contour vs. 1996 94 dBA SEL Areas Newly Exposed, shows Alternative B 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to the 1996 94 dBA SEL noise contour. As shown on **Figure S17** and presented in **Table S73**, Alternative B 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions.

Figure S18, Alternative B 2015 94 dBA SEL Part 161 Mitigation Contour vs. 2000 94 dBA SEL Areas Newly Exposed, shows Alternative B 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to 2000 94 dBA SEL noise contour. As shown on **Figure S18** and presented in **Table S74**, Alternative B 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to Year 2000 conditions.

In addition, some areas newly exposed to the 94 dBA SEL under Alternative B, with the inclusion of mandatory over-ocean procedures would be outside of the 1996 ANMP noise contours, as shown on **Figure S19**, Alternative B 2015 94 dBA SEL Part 161 Mitigation Contour vs. ANMP Areas Newly Exposed and listed in **Table S75**, Alternative B 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1992 65 CNEL Noise Contour).

4.3.2 Newly Exposed Areas

Figure S21, Alternative C 2015 94 dBA SEL Part 161 Mitigation Contour vs. 1996 94 dBA SEL Areas Newly Exposed, shows Alternative C 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to the 1996 94 dBA SEL noise contour. As shown on **Figure S21** and presented in **Table S78**, Alternative C 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions.

Figure S22, Alternative C 2015 94 dBA SEL Part 161 Mitigation Contour vs. 2000 94 dBA SEL Areas Newly Exposed, shows Alternative C 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to 2000 94 dBA SEL noise contour. As shown on **Figure S22** and presented in **Table S79**, Alternative C 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to Year 2000 conditions.

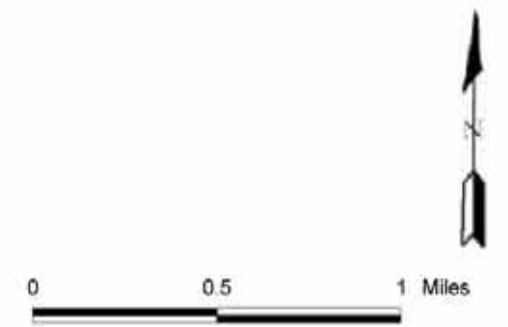

In addition, some areas newly exposed to the 94 dBA SEL under Alternative C, with the inclusion of mandatory over-ocean procedures would be outside of the 1996 ANMP noise contours, as shown on **Figure S23**, Alternative C 2015 94 dBA SEL Part 161 Mitigation Contour vs. ANMP Areas Newly Exposed and listed in **Table S80**, Alternative C 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1992 65 CNEL Noise Contour).

4.4.2 Newly Exposed Areas

Figure S25, Alternative D 2015 94 dBA SEL Part 161 Mitigation Contour vs. 1996 94 dBA SEL Areas Newly Exposed, shows Alternative D 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to the 1996 94 dBA SEL noise contour. As shown on **Figure S25** and presented in **Table S83**, Alternative D 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1996 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to 1996 baseline conditions.

Figure S26, Alternative D 2015 94 dBA SEL Part 161 Mitigation Contour vs. 2000 94 dBA SEL Areas Newly Exposed, shows Alternative D 2015 94 dBA SEL noise contour with the incorporation of over-ocean procedures compared to 2000 94 dBA SEL noise contour. As shown on **Figure S26** and presented in **Table S84**, Alternative D 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 2000 94 dBA SEL) even with the incorporation of mandatory over-ocean procedures, some residential parcels would be newly exposed to noise levels of 94 dBA SEL compared to Year 2000 conditions.

In addition, some areas newly exposed to the 94 dBA SEL under Alternative D, with the inclusion of mandatory over-ocean procedures would be outside of the 1996 ANMP noise contours, as shown on **Figure S27**, Alternative D 2015 94 dBA SEL Part 161 Mitigation Contour vs. ANMP Areas Newly Exposed and listed in **Table S85**, Alternative D 2015 94 dBA SEL Noise Contour Part 161 Mitigation Residential Uses Newly Exposed (Compared to 1992 65 CNEL Noise Contour).
