# Airport IT Costs: Primer for the CFO and Executive Director

Moderator: John Payne

Pueblo Technology Group

Panel:

Mark O'Connor, Chief Innovation Officer Los Angeles World Airports (LAWA)

Greg Baster, Managing Director

Inari Group LLC

## **Airport IT Costing**

- Journey not a destination
- Use IT budgeting to align with business
- Re-confirm your IT governance assumptions
- Commit to 3 years
- Use your last completed FY as the starting point
- Bite off what you can chew...
  - There's always more data you can gather later
- Commit to doing the data mining with your team (not a consultant)
  - Means losing some of your best people for the duration it takes to collect the data

## **IT Costing Project Drivers at LAWA**

- New Mayor / New Board
- Major IT projects wrapping up
  - Time to move focus from 'Build' to 'Operate'
- Dollars speak louder than words
  - Where are we really expending our effort?
  - Is it adding value to the business?
- IT Governance Check and Balance
  - Does spending align with IT Governance expectations
  - Forecasting future LAWA maintenance budgets
- Major new initiatives planned

## **LAWA Operating Costs**

(source LAWA IT Strategic Plan)

## **Cost of BOAC Actions**

(OpEx + CapEx source LAWA IT Strategic Plan)

## **Preparing to Study IT Costs**

- The Challenges
  - Scoping the problem
    - What's not in scope
  - Gathering the data
    - 3<sup>rd</sup> party costs need the most attention
    - Clearly distinguishing Opex and Capex costs
  - Articulating what IT does for the business
    - Business functions
      - De-couple from the airport organizational chart
  - Getting the buckets right
    - Costs will move from one category to another
  - Seeing trends in one year's worth of data avoid it

### **Two Key Factors Determine Cost**

Breadth and Depth of Demand for IT Services

- Number of systems and technology services
- Extent of usage across the organization
- Commonality of use across the organization
- Demand 'gaps'

Efficiency of Supplying IT Services (Optimization)

- Alignment with business objectives
- "Right size" solutions
- Technology complexity
- Duplication of systems
- Sourcing strategy
- Procurement process
- Technology innovation
- Operating model
- Caliber of staff

Focus of this review

Governance is the common thread that helps ensure demand for IT services is properly met with cost effective solutions

### Cost Allocation Is Based on Estimated Utilization

IT Infrastructure Component Costs

IT Infrastructure
Services

Business Services

LAWA Business Functions

- Data Center
- Disaster Recovery

- Staff
- Software Maintenance
- 3rd Party Services
- Hardware Replacement
- Hardware Maintenance
- Miscellaneous

- Windows Platform
- Unix Platform
- Storage Platform

- Staff
- Software Maintenance
- 3rd Party Services
- Hardware Replacement
- Hardware Maintenance
- Miscellaneous

#### **CORE BUSINESS SYSTEMS**

- FAMIS/SAP
- Maximo
- TASS (SITA)
- AEGIS
- etc

#### LAWA-WIDE SERVICES

- Client Devices
- Telecommunications
- Cyber Security
- Productivity
- Collaboration
- Service Desk
- Content Management

#### CORE OPERATIONS

- Airside Operations
- Terminal Operations
- Landside Operations
- Safety and Security
- Facilities & Maintenance
- Airport Development
- Cross Functional

#### MANAGEMENT & ADMIN

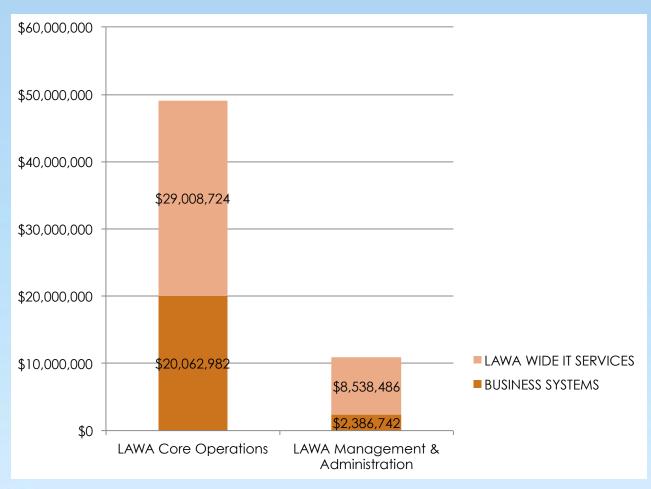

- Legal & HR
- Asset and Material
- Finance
- Procurement
- Communications

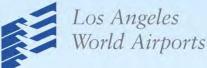

A four stage cost rollup provides transparency of how underlying IT costs are aggregated into more advanced services for LAWA business functions

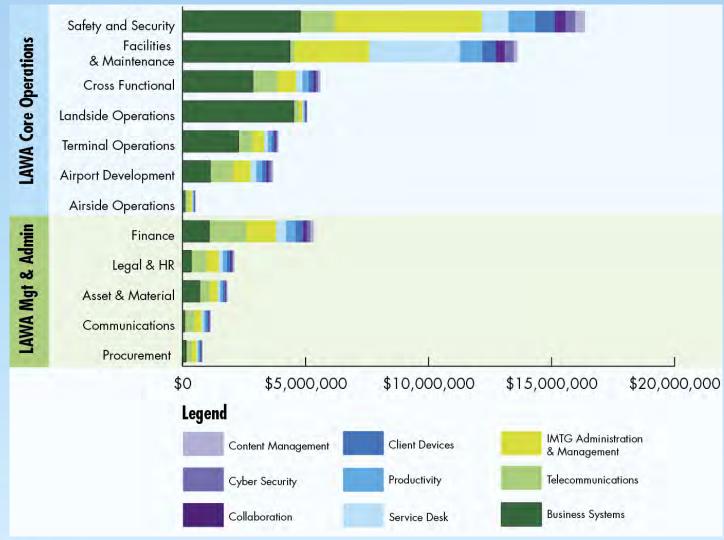

### **High Level Spend Analysis**

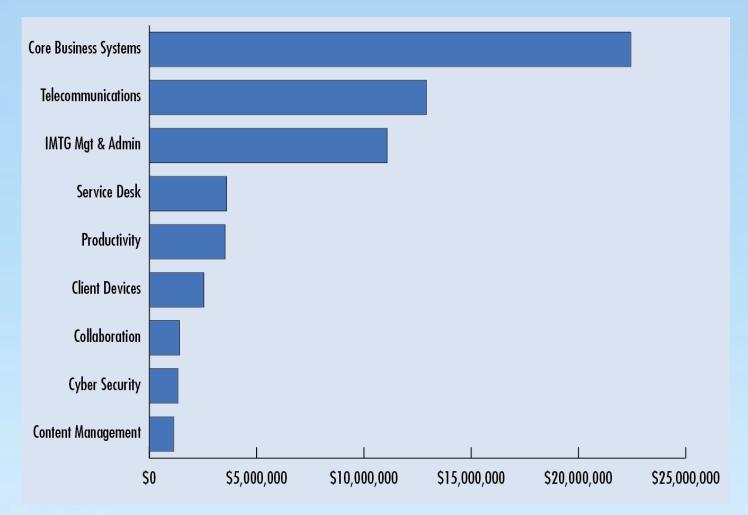

# **Allocation of Spend Across LAWA Business Functions**

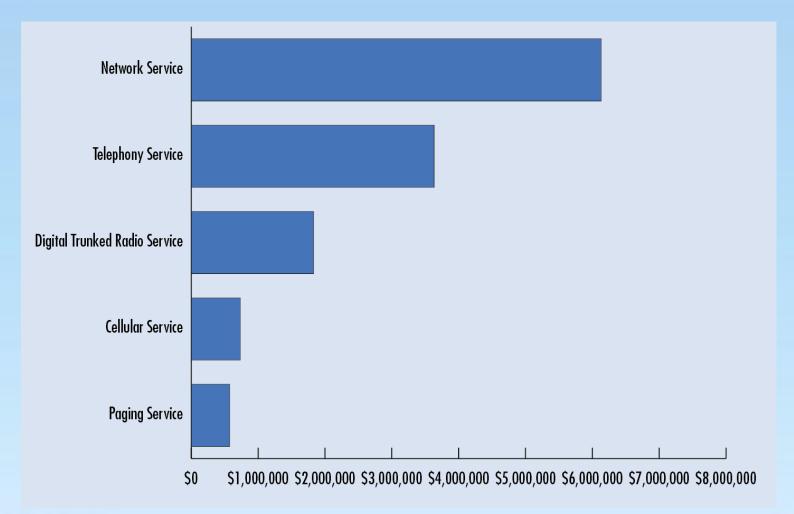

### **Comparison of IT Business Services Spend**

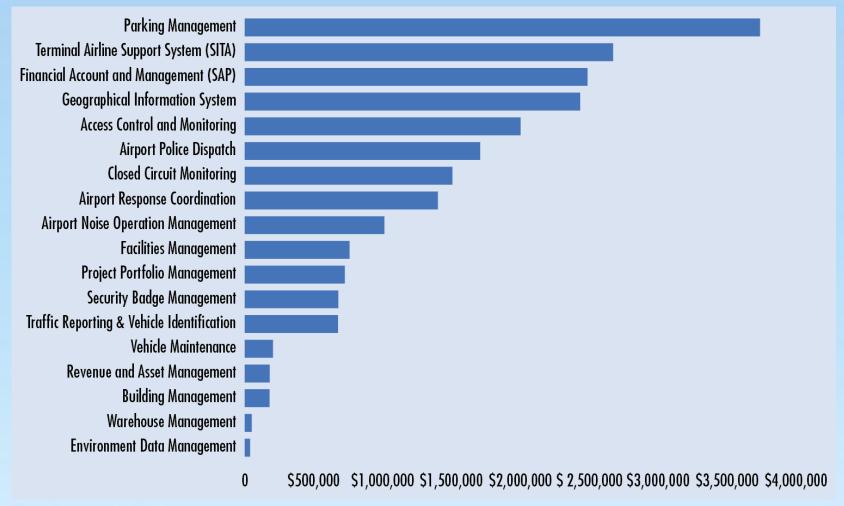

### **Telecommunications Spend Breakdown**

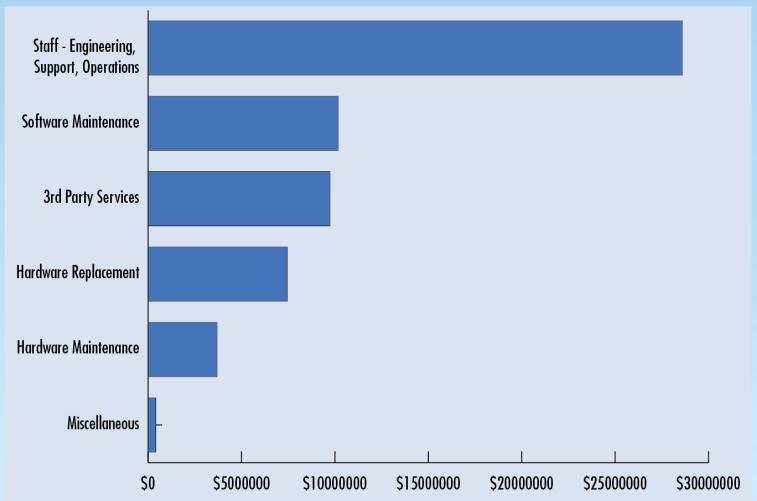

### **Comparison of Business Systems Spend**

## **Total Spend by IT Cost Type**

## **LAWA Cost Allocation Summary**

(source LAWA IT Strategic Plan)

\* Staffing cost taken out

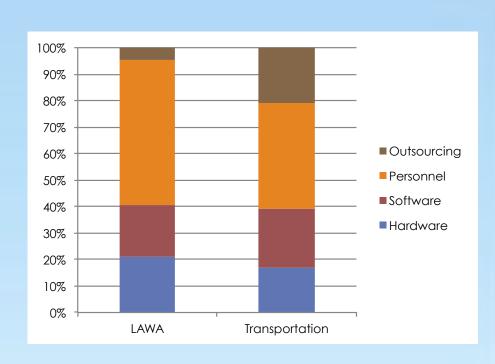

### **High Level Benchmarks**

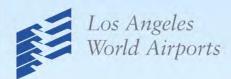

#### IT Cost per Employee

## \$35,000 \$25,000 \$20,000 \$15,000 \$10,000 \$0 FY12-13

Based on Gartner metrics for Transportation industry.

#### Distribution of IT Spend

## **Lessons Learned**

- Focus on cost components IMTG Management can optimize easily
- Continue to evaluate costs
  - Network and Telecommunication Costs
  - Create stronger alignment between business needs and IT costs, including total lifecycle costs
  - Continue evaluating IT Costs each year
- Continue to evaluate LAWA against industry benchmarks

## **Lessons Learned**

(continued)

- Allocation assumption is key
  - Must have CIO and CFO consensus
  - Shared systems are problematic
    - CCTV, ACAMS, Badging / Credentialing
- Networking costs reflect building a carrier class network; most airports do not have integrated networks
- Collaboration costs are probably too low
- Tech refresh should focus more on backend (network, storage and servers) than frontend (PCs/Windows/Office)

## **Lessons Learned**

(continued)

- Invoicing must be set up to track costs going forward
  - Vendors that cover a number of services need to invoice by function
    - E.g., "ATT \$X,XXX,XXX.XX" isn't transparent
- Commit to three years to see the trends
  - FY13 done (just completed)
    - 1.5 FTEs + 4 months (Feb 2014 May 2014)
  - FY14 in process
  - FY15 pending

## ACI – NA BIT Committee Proposal

- LAWA offers to be the repository for ACI NA BIT airport IT budgeting data
- Airports that want to participate complete a budgeting spreadsheet
- A summary of participating airports is provided on an annual basis at the national BIT meeting
  - 30 minute session
  - Similar to the annual SITA IT Survey Update
