

INCENTIVE FUNDING ANNOUNCEMENT

LAX Ground Support Equipment Incentive Program

Los Angeles World Airports is pleased to announce a new **LAX Electric Ground Support Equipment Incentive Program**. This incentive program offers to buy-down the cost of new, electric zero-emission Ground Support Equipment (eGSE) that replaces conventionally fueled Ground Support Equipment (GSE). The incentive program has the following goals:

- To encourage LAX GSE operators to transition from diesel or conventionally-fueled GSE to eGSE.
- To achieve further GSE emission reductions than would be realized under the LAX GSE Emission Reduction Policy.
- To expedite the replacement of conventionally-fueled GSE at LAX sooner than required by the LAX GSE Emission Reduction Policy or proposed state regulations.

Owners of existing conventionally fueled GSE operating at LAX are eligible to apply under this incentive program. This may include, but not necessarily limited to, airlines, ground support service providers, cargo transporters, parcel handlers, etc.

Application forms and additional information is included in the attached Funding Opportunity Announcement & Application Preparation Package. This can also be accessed through the LAWA website at: [LAX Ground Support Equipment](https://www.lawa.org/en/lawa-environment/lax/lax-gse-emissions-reduction-program) (<https://www.lawa.org/en/lawa-environment/lax/lax-gse-emissions-reduction-program>).
