Erection of steel for the third and final bay of the core nearing completion.  
January 20, 2012

Aerial view of the temporary connector between the old and new concourses (circled). This connector will allow gates in the north concourse to open while other areas of the new facility are still under construction.

December 28, 2011

Another view of the temporary connector between the old and new concourses. This aerial also highlights how much glass the building will have and the wave-like appearance of the roofline.

December 28, 2011

On January 24, 2012, Mayor Antonio Villaraigosa, LAWA Executive Director Gina Marie Lindsey, LAWA Deputy Executive Director Roger A. Johnson, and the Walsh Austin team gave members of the media their first tour of the new facility.

December 28, 2011

In less than four weeks time, the steel for the new Central Utility Plant (CUP) was set in place. A remarkable accomplishment but it is just the beginning of this major project.

A topping out ceremony was held on January 24 to commemorate the placement of the final beam for the new Central Utility Plant's steel frame. Employees signed the beam before hoisting it into place. It is traditional to place a pine tree and flag on the beam for good luck.
