## 1. Terminal B: Construction Progress

- Construction of the new Vertical Core at Terminal B is making progress with the installation of glass panels at terminal's north end
- Due to this portion of construction, the escalators and stairs at the north end of the terminal are closed; signage is in place directing guests to the south escalators
- To facilitate this and other construction, the information booth previously located at Terminal B's north end has been temporarily relocated to the terminal's south end

## 2. Intermodal Transportation Facility – West: Construction Update

- Construction of the ITF-West continues with station steel erected and work on the concrete train tracks ongoing for the future elevated guideway
- Scheduled to open to the public later this year, ITF-W will feature approximately 4,300 parking stalls and a connection to the future Automated People Mover train upon that project's completion

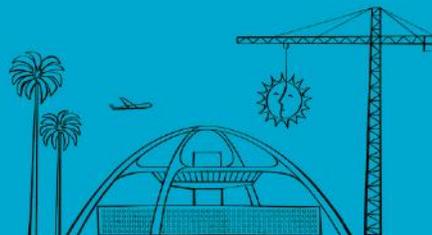

*ITF-W station steel and guideway progress*

*Rendering of the completed ITF-W building*

Change is in the Air(port).

**LAX** WAY BETTER. REALLY.

## 3. ABM Smart Parking: Project Update

- The Smart Parking Project is starting work in Parking Structure 4 this week, which will bring a reduction in available parking stalls through December 2021
- Currently, the project is active in Parking Structures 1, 3, 4, 5 & 6; Signage is posted to direct vehicles around various construction activities
- Improvements under this project include installation of electric vehicle chargers, “smart parking” systems to indicate available parking stalls and capacities, new pay-on-foot stations, painting and more
- Access to and from all structures, as well as vertical circulation, is maintained at all times

*New EV Chargers have been installed in Parking Structure 1*

*Example of “smart parking” system with stall availability lights*

Change is in the Air(port).

**LAX** WAY BETTER. REALLY.
